Q—The Gerber Center, 4th Floor

Note: There are multiple concurrent presentations during each one-hour time block. It is expected that presenters sharing a given time and room will divide the available time evenly (e.g., four presenters each have 15 minutes total for delivering their presentation and answering questions; three presenters have 20 minutes total). Presenters appear in the order expected during the hour.

Those attending a session will be expected to attend for the full hour rather than entering/exiting between presenters. This will minimize disruption and time between presenters. Moderators for each session will be tasked with keeping speakers on time and, if necessary, interrupting a presentation if running long to allow time for all presenters.

SESSION I-A [OLIN AUDITORIUM]

10:45–11:45 a.m.

FEATURED FACULTY PRESENTATION

Dr. Jennifer Burnham

Geography

Which Way Did They Go? A Biogeography Study of Atlantic Puffin (Fraterecula arctica)

Migratory Pathways from NW Greenland

Session I-A: Olin Auditorium [10:45–11:45 a.m.]

Atlantic puffins of the low and sub-Arctic regions are a well-studied, but declining seabird species. Less well-studied, but equally (or greater) at risk due to climatic change, are the Atlantic puffins of northwest Greenland in the high Arctic (76° N). Here we studied the migratory patterns of nine adult puffins (six males and three females) using non-transmitting archival light loggers (geolocators). This is the northern most studied puffin colony in the world. Results of this previously understudied puffin colony show that this

population has the longest migratory distance of any other Atlantic puffins, with females traveling two to three times as far as males. Females and males display distinctly different migration strategies, with females using a leap frog strategy and males utilizing chain migration. On their outward migration, puffins from northwest Greenland display a behavior never before documented—a crossing of the Greenland Ice Sheet. For a portion of the non-breeding season, females share winter use areas of the North Atlantic Ocean with those of puffins migrating from Ireland and Norway, and utilize several Marine Protected Areas of the Mid-Atlantic Ridge. These findings highlight the distinct differences in low and high Arctic puffin populations (confirmation of possible sub species?) and the continued protection of critical high seas seabird wintering areas.

A Legacy of Nils Hasselmo: Augustana Alumni Navigate Grad School and Beyond

SESSION II-A: Olin Auditorium [Noon-1 p.m.]

This session honors Dr. Nils Hasselmo, Class of 1957, former president of the University of Minnesota and former member of the Augustana Board of Trustees, who recently passed away. Dr. Hasselmo, a generous benefactor of Augustana College, endowed funds for an award that provides financial support for an Augustana student who has shown academic excellence and plans to pursue a career in higher education. This session features two former recipients of the Hasselmo award. The presenters will discuss Dr. Hasselmo's gift, impact and legacy on their career path and choices they've made since graduation. The path shared demonstrates the uncertainty, challenges and concrete realities of graduate school and the job market and how their experience at Augustana has equipped them to be adaptable and think outside disciplinary boundaries.

The Journey to Selma: Reliving the Past to Shape the Future

SESSION IV-A: Olin Auditorium [2:30-3:30 p.m.]

The Journey to Selma is a six-day program to relive iconic moments from the Civil Rights era. Students traveled to Memphis, Birmingham, Montgomery and Selma, visiting landmarks such as the Lorraine Motel, 16th Street Baptist Church, Dr. King's Church and Parsonage, and the Edmund Pettus Bridge. It was an eye-opening experience as students learned how slavery and the Civil Rights Movement played a huge role in shaping American history. In this session, students will share the impact of this experience and how it influences them to advocate for change at Augustana and beyond.

NeurdFest

The Neuroscience Program's annual brain awareness outreach event, NeurdFest, is now in its fifth year. Since 2015, second-grade students from Longfellow Elementary have come to campus to learn about the brain. During Celebration of Learning, as many as 50 elementary students learn about the general functions of the brain, how the brain engages with sensory information, how brain cells transmit information, how the brains of different animals compare and, perhaps of greatest practical significance, why it is important to practice brain safety, all through a series of interactive exhibits. As facilitators of these exhibits, Augustana student volunteers learn how to engage others with the academic discipline in which most of them have chosen to major.

The Center for Creativity is hosting a Creativity Fair, an exhibit of creative works by students, staff and faculty.

10 a.m.-3 p.m.

Bergendoff Hall (inside and outside)

Jessica Greene, Hannah Vercellotti, Lauren Muzzalupo, Elizabeth Rennolds, Elizabeth Fulkerson

Project advisor: Dr. Jessica Schultz, psychology

Smart Spending Project

Information will be presented about companies around the Quad Cities that work for positive social change, as well as benefits and drawbacks from places where we typically spend our money. This session is presented by students who are involved with the Guatemala Study Abroad program.

10:45 a.m.-3:30 p.m.

The Gerber Center, 4th floor hallway

Rebecca Garbe, Mak Leach, Shayna Smith

Project advisors: Dr. Jennifer Popple, theatre arts; Dr. Umme Al-Wazedi, English

Period Product Drive – Promoting a More Inclusive Campus Project

Following a recent study-away program in India in which students studied grassroots activism, the students decided to seek ways to improve the Augustana campus community. Specifically, the project will culminate in a proposal regarding how Augustana can make bathrooms on campus more inclusive of all members of the student body. One of the ways in which students hope to increase inclusivity on campus is to make period products more available to those who menstruate. The drive aims to collect period products or monetary donations. All proceeds will go to Campus Cupboard where students can obtain these products for free.

10:45 a.m.-3:30 p.m.

The Gerber Center, 4th floor hallway

Augie Abroad Photo Contest Display

Each year Augustana celebrates its culture of study away through the Augie Abroad Photo Contest. Students are invited to submit photos taken as part of Augustana study-away programs from the past year in four categories: architecture and design, culture and celebration, nature, and images of Augustana students. During Celebration of Learning, the winning photos are displayed in The Gerber Center and Thomas Tredway Library.

10:45 a.m.-3:30 p.m.

The Gerber Center, 4th floor near fireplace

Augustana Invitational Robotics Challenge 2019

Project advisor: Dr. Forrest Stonedahl, computer science and mathematics

The 4th Annual Augustana Invitational Robotics Challenge involves student teams from Augustana and other schools in the region to compete with robots they have designed, built and programmed.

7:30-9:30 p.m.
