If all my possessions would be taken from me with one exception,
I would choose to keep the power of communication,
for by it, I would soon regain all the rest.

Augustana College Mission and Goals

Augustana College, rooted in the liberal arts and sciences and a Lutheran expression of the Christian faith, is committed to offering a challenging education that develops qualities of mind, spirit, and body necessary for a rewarding life of leadership and service in a diverse and changing world.

To accomplish this mission, Augustana sets as its goals:

1. To develop in each qualified student the characteristics of liberally educated people through a program of general studies.

2. To develop in each student expertise in a major field of study.

3. To encourage each student to confront the fundamental religious issues of human life through the academic study of religion and the campus ministry program.

4. To supplement students’ formal curricular programs with a full range of opportunities for personal growth through participation in co-curricular activities.

5. To encourage the personal and social growth of students through residential life programs and extra-curricular activities.

6. To offer its church and community the benefit of its programs and staff within the context of its basic mission as an undergraduate liberal arts college.

Augustana College Student Learning Outcomes

In November 2012, the faculty approved a list of college-wide learning outcomes as detailed below. Augustana graduates possess a sense of personal direction and the knowledge and abilities to work effectively with others in understanding and resolving complex issues and problems.

**Intellectual Sophistication**

**Disciplinary Knowledge: Understand**

Demonstrate an extended knowledge of at least one specific discipline and its interdisciplinary connections to the liberal arts, reflected in the ability to address issues or challenges and contribute to the field.

**Critical Thinking & Information Literacy: Analyze**

Critique and construct arguments. This requires the ability to raise vital questions, formulate well-defined problems, recognize underlying assumptions, gather evidence in an efficient, ethical and legal manner, suspend judgment while gathering evidence, evaluate the integrity and utility of potential evidence, critique and incorporate other plausible perspectives, and determine a reasonable conclusion based upon the available evidence.

**Quantitative Literacy: Interpret**

Interpret, represent and summarize information in a variety of modes (symbolic, graphical, numerical and verbal) presented in mathematical and statistical models; use mathematical and statistical methods to solve problems, and recognize the limitations of these methods.

**Interpersonal Maturity**

**Collaborative Leadership: Lead**

Collaborate and innovate, build and sustain productive relationships, exercise good judgment based on the information at hand when making decisions, and act for the good of the community.

**Intercultural Competency: Relate**

Demonstrate an awareness of similarity and difference across cultural groups, exhibit sensitivity to the implications of real and imaginary similarities and differences, employ diverse perspectives in understanding issues and interacting with others, and appreciate diverse cultural values.

**Communication Competency: Communicate**

Read and listen carefully, and express ideas through written or spoken means in a manner most appropriate and effective to the audience and context.

**Intrapersonal Conviction**

**Creative Thinking: Create**

Synthesize existing ideas, images or expertise so they are expressed in original, imaginative ways in order to solve problems and reconcile disparate ideas, and to challenge and extend current understanding.

**Ethical Citizenship: Respond**

Examine and embrace strengths, gifts, passions and values. Behave responsibly toward self, others and our world; develop ethical convictions and act upon them; show concern for issues that transcend one’s own interests, and participate effectively in civic life.

**Intellectual Curiosity: Wonder**

Cultivate a life-long engagement in intellectual growth, take responsibility for learning, and exhibit intellectual honesty.

Augustana College General Education Requirements for the Bachelor of Arts Degree

General Requirements: Summary

- 124 credits as defined by Augustana
  - 60 credits must be earned from Augustana
  - Last 12 credits applied to degree must be earned at Augustana
  - Minimum of 40 credits at the 300- and 400-level; no more than 4 credits in MULS, MUEN, and MUCH courses may contribute to this requirement
- No more than 40 credits with the same subject code designation may be applied to the degree-required minimum of 124; students who exceed the 40-credit maximum will need to exceed the required 124 credits minimum by the equivalent amount
- No more than 3 credits from physical education activities
- No more than 8 credits in music ensembles or IND/DIR
- No more than 12 credits in internships
- 2.0 GPA overall
- Major of at least 24 credits, with at least 8 credits of 300-400 level courses at Augustana

First-Year Liberal Studies Sequence

- FYI 101 (Fall, 4 credits)
- FYI 102 (Spring, 4 credits)
- OR equivalent Foundations/Logos sequence

Learning Perspectives Requirements

- One course in each perspective
  - Perspective on the Arts (PA, 4 credits)
  - Perspective on Human Values and Existence (PA, 4 credits)
  - Perspective on the Individual and Society (PS, 4 credits)
  - Perspective on Literature and Text (PL, 4 credits)
  - Perspective on the Past (PP, 4 credits)
  - Perspective on the Natural World (PN, 4 credits)

Diversity Requirements

- Global Diversity (G, 4 credits)
- U.S. Diversity (D, 4 credits)

Quantitative Literacy Requirement

- Quantitative Literacy (Q, 4 credits)

Physical Education Requirements

- 2, 1-credit HEPE activity courses

Second Language Requirements

- Language 101 (4 credits)
- Language 102 (4 credits)
- OR equivalent (transfer course, placement test scores, etc.)

Reasoned Examination of Faith Requirement

- Reasoned Examination of Faith (REF, 4 credits)

Capstone Requirement

- Senior Inquiry (variable # of credits based on academic major)

Find complete list of requirements online at https://www.augustana.edu/academics/catalog/curriculum-organization/bachelor-of-arts.
Your Right to Education Free from Discrimination and Harassment

Augustana College is committed to fostering a safe, inclusive environment free from all forms of discrimination and harassment. Our Policy Against Discrimination and Harassment describes your right to freedom from discrimination and harassment on the basis of race, color, religion, national origin, service in uniformed service, veteran status, sex, age, political ideas, marital or family status, pregnancy, disability, genetic information, gender identity, gender expression, sexual orientation, or any other classification protected by law. Consistent with state and federal requirements, our Policy against Sex Discrimination specifically prohibits discrimination on the basis of sex and gender, including sexual assault, sexual exploitation, sexual harassment, stalking, and relationship violence. To find resources available to you or anyone on campus who has experienced discrimination or harassment, please visit https://www.augustana.edu/student-life/TitleIX/discrimination-policy.

Faculty members are required to report any information they have about potential violations of these policies to help foster a safer campus for all. If you would like to speak with someone confidentially about these issues, you can visit Counseling Services (or phone (309) 794-7357), visit Campus Clergy (or phone (309) 794-7213), or visit the Campus Confidential Advisor. All college employees are mandated reporters of suspected cases of child abuse and neglect.
CSD at Augie!: One Department—Two Degrees

CSD at Augie is a vibrant department filled with dedicated professors, clinical supervisors, and support staff focused on helping talented Augustana students fulfill their vocational and personal goals through completion of rigorous coursework, internships, research, and community service. We offer an undergraduate major in Communication Sciences and Disorders that leads to a Bachelor of Arts degree, and a graduate program in Speech-Language Pathology that leads to a Master of Science degree.

The master’s program in Speech-Language Pathology at Augustana College is an Applicant for Candidacy by the Council on Academic Accreditation in Audiology and Speech-Language Pathology (CAA) of the American Speech-Language-Hearing Association, 2200 Research Boulevard #310, Rockville, Maryland 20850, (800) 498-2071 or (301) 296-5700.

This Academic Advising Manual is intended to assist in the design of the student’s academic plan of study and to clearly delineate the requirements of the Bachelor of Arts degree in Communication Sciences and Disorders and the requirements of the Master of Science degree in Speech-Language Pathology. The Academic Advising Manual is offered in addition to the Augustana College Student Catalog, which you can find online at https://www.augustana.edu/academics/catalog.
Admission Policies at Augustana College

Admission into the Bachelor of Arts in Communication Sciences and Disorders Program
Any degree-seeking student at Augustana may declare the CSD major as early as the middle of First Year, Spring Semester. There are no prerequisites to be able to declare the CSD major. To declare the CSD major, students must complete the Major Declaration form, obtain signatures from their First-Year Advisor and the Chair of CSD, and turn in the form to the Registrar's Office.

While there are no specified criteria for students to be able to remain in the CSD major, students seeking to complete the clinical internship in CSD must achieve a cumulative GPA of at least 3.0 prior to the end of Junior, Spring Semester, and then maintain it throughout Senior Year.

Admission into the Master of Science in Speech-Language Pathology Program
There are three time periods when students can apply to the Master of Science in Speech-Language Pathology Program: 1) as an Augustana College prospective first-year student (Direct Admission), 2) as an Augustana College junior CSD major (Junior-Year Admission), and 3) as a senior-year student pursuing a bachelor’s degree or as a bachelor’s degree holder (Regular Admission). The application process varies depending on the time of application. The processes for the three types of applications follows.

Direct Admission
Prospective first-year students applying to Augustana, competing for up to 10 secured spots Enrolled into graduate program after earning B.A. at Augustana

Application Process (Office of Admissions)
Students must first be accepted into Augustana Students then inform Admissions they would like to be considered as a direct admit into the Master’s Program in Speech-Language Pathology if they meet the following criteria:
  • Minimum overall high school GPA of 3.4
  • No grade below a B- in any science class
  • Meet all items on the Essential Functions checklist
  • Submit a 400-word CSD essay: How would a liberal arts undergraduate education prepare you for a career as a speech-language pathologist?
  • Interview with an Admissions counselor
Applicants who meet the above criteria are forwarded to CSD

Selection Process (CSD Department)
Interview with two CSD faculty members Evaluation of CSD essay

Notification (Office of Admissions)
Admissions will notify all applicants of decision

Maintaining a Secured Spot (CSD Department)
Minimum overall college GPA of 3.0
Minimum CSD GPA of 3.4
No grades below a B- in CSD and CSD-supporting courses
**Junior-Year Admission**
Augustana CSD juniors competing for the spots unfilled by direct admit students
Enrolled into Master of Science in Speech-Language Pathology Program after earning B.A. at Augustana

**Application Process (Office of Admissions)**
- Minimum overall college GPA of 3.0
- Minimum CSD GPA of 3.4
- No grades below a B- in CSD and CSD-supporting courses
- Meet all items on the Essential Functions checklist
- Submit 400-word CSD essay: How is your Augustana education preparing you for a vocation in speech-language pathology?

**Selection Process (CSD Department)**
- Interview with two CSD faculty members
- Evaluation of CSD essay
- Evaluation of work completed to date

**Notification (Office of Admissions)**
- Admissions will notify all applicants of decision

**Maintaining a Secured Spot (CSD Department)**
- Minimum overall college GPA of 3.0
- Minimum CSD GPA of 3.4
- No grades below a B- in CSD and CSD-supporting courses

**Regular Admission**
Bachelor’s degree-holding individuals competing for any open spots
Enrolled into graduate program upon acceptance

**Application Process (Office of Admissions)**
- Bachelor’s degree
- Minimum combined verbal and quantitative GRE score of 300
- Minimum overall college undergraduate GPA of 3.0
- Minimum CSD GPA of 3.4
- No grades below a B- in CSD and CSD-supporting courses
- Completion of CSD, or equivalent, courses:
  - Introduction to CSD
  - Anatomy, Physiology, and Science of Speech
  - Anatomy, Physiology, and Science of Hearing
  - Phonetics
  - Speech and Language Development
  - Audiology
  - Aural Rehabilitation
  - Neural Bases of Human Communication
  - Research Methods
- Completion of CSD-supporting courses, or equivalent:
  - Biology (human or animal focused)
  - Human Development
  - Statistics
  - Physics or Chemistry
  - Linguistics
Two letters of recommendation
Meet all items on the Essential Functions checklist
Submit CSD essay: How did your undergraduate education prepare you for a vocation in speech-language pathology?
Submit resume

Selection Process (CSD Department)
Interview with two CSD faculty members
Evaluation of work completed to date

Notification (Office of Admissions)
Admissions will notify all applicants of decision

Student Conduct
Policies for Academic and Clinical Integrity

Augustana College students sign an honor code, presented below, that includes a sequence of steps in addressing violations that include, among other offenses, plagiarism, cheating, and reusing assignments (i.e., self-plagiarism).

In the CSD undergraduate and graduate programs, the ASHA Code of Ethics will be a centerpiece of clinical education on campus and in externship settings. The Essential Functions document that students sign each year lists several ways in which ethical conduct is expected. The grading rubric that will be used for Practicum and Externship experiences includes standards for professionalism and integrity. CSD’s detailed policy for clinical settings can be found in the CSD Clinic Manual.

Academic Integrity: Augustana College Honor Code
Section 1: Mission
We, the students of Augustana College, committed to the ideals of integrity, accountability, fairness, and honesty, hereby establish this academic Honor Code in order to promote and foster intellectual and personal growth.

Section 2: Statement of Purpose
According to its mission statement Augustana College “…is committed to offering a challenging education that develops qualities of mind, spirit, and body.” To achieve this goal Augustana expects its community to practice honor and integrity. The Honor Code sets the foundation and boundaries to ensure academic excellence and stability in an evolving and dynamic world. The Honor Code holds each individual accountable to the community of Augustana College.

Section 3: Infractions
Section 3.1 Cheating
To cheat on an exam is:
  o to use books, notes, or other materials not explicitly permitted by the instructor in taking the exam;
  o to copy other students’ work in taking an exam;
  o to use copies of examination material (whether stolen or accidentally obtained) in preparing for an examination when the instructor has not made these materials public by prior distribution;
  o to assist a student in cheating in any of the aforementioned three ways.

To cheat on an assignment is:
  o to use materials or sources explicitly forbidden by the instructor in completing the assignment (including the ideas and work of other students when forbidden);
  o to copy another individual’s work; or
  o to assist students in cheating as defined above.

Section 3.2: Lying
Lying is any falsification that is committed with the intent of gaining an academic advantage. A falsification is:
  o the manifestation of untruth with the intent to mislead;
disregard for the truth;
false representation of one’s self; or
intentionally creating false data.

Section 3.3: Stealing
Stealing is the deliberate taking of another individual or group’s property without consent, permission, or acknowledgement with the intent of gaining an academic advantage.

Section 3.4: Plagiarism
Plagiarism is the misrepresentation of someone else’s research, thought, or writing as one’s own. Plagiarism occurs when a student uses the ideas or phrasing of another individual or group and presents the information as their own without crediting the original source.

Plagiarism includes, but is not limited to, the following:
- use of direct wording, artistic creations and/or expressions (written or musical) without proper acknowledgements
- false citation: incorrect or inadequate citation of sources
- purchasing, downloading, or using papers written by another individual

Section 3.5: Multiple Submission
“Multiple submission involves the submission for credit—without authorization of the instructor receiving the work—of substantial portions of any work (including oral reports) previously submitted for credit at any academic institution, or attempts thereof.” It is assumed that the work you submit for credit is original in each and every assignment, unless stated otherwise. If allowed to use previous work, both you and your instructor(s) need to agree to alternate terms, including using proper citations for your previous work. Augustana is committed to each student’s intellectual growth and so it is expected that all assignments demonstrate new knowledge particular to that individual assignment and class.

The following are examples of multiple submission and would require informing and receiving permission from the instructor(s):
- Submitting the same paper or nearly the same paper in the same or different classes, at any time during your academic career.
- Submitting work that you previously submitted and revised.
- Submitting group work from another assignment and representing it as one’s own.

Section 4: Honor Pledge
Upon or prior to entering Augustana College students must sign the Honor Pledge, “My name, below, signifies that I have read and understand the Honor Code of Augustana College. By signing this pledge, I am accepting the Honor Code and acknowledge that it is my responsibility to uphold its principles.” Signing the pledge signifies that the student understands and supports the Honor Code.

In addition, a Professor may elect to require a student to include the statement, “In compliance with the Augustana Honor Code, I have neither given nor received unauthorized aid on this piece of work.” on all academic work or sign a similar statement at the beginning of the term, but this elective step is not required to enforce the pledge.
PART TWO

Bachelor of Arts in Communication Sciences and Disorders Program
Bachelor of Arts in Communication Sciences and Disorders
Mission and Goals

The Communication Sciences and Disorders Department’s undergraduate degree program seeks to develop in every student an appreciation of the importance of communication in a person’s sense of being and self-worth, and of the need to treat all individuals with dignity and respect. CSD majors complete a rigorous program of study that includes coursework, clinical experiences, service learning, and research in preparation for graduate study and positions of ethical leadership and service in the community. CSD majors participate in departmental experiences that draw upon and further develop the habits of open mindedness, reflective inquiry, critical thinking, and independence that are central to the liberal arts. Academic and clinical faculty provide intentional and individualized teaching, mentoring, and advising that fosters a firm knowledge base, an emerging clinical competence, strong written and oral communication skills, and respectful interactions. Through study in CSD, students improve the quality of life for others and through this service lead committed lives.

To accomplish this mission, CSD sets as its goals that:

1. Students will demonstrate an appreciation for the importance of communication to a person’s quality of life.

2. Students will engage in ethical behavior by conducting themselves with academic and professional integrity.

3. Students will have a firm foundation in anatomical/physiological, physical/psychological, linguistic/psycholinguistic, and cultural bases of communication, as well as the basic principles and procedures for identification and remediation of speech, language, and hearing impairments in individuals across the lifespan.

4. Students will express themselves orally and in writing in a manner that is reflective, involves critical thinking, and is appropriate for personal, academic, and professional audiences.

5. Students will acquire the art and science skills needed to become highly competent clinicians who engage in evidence-based practice, actively participate in professional organizations, develop independence, and embrace life-long learning.
CSD at Augie!

The CSD major:
- Provides a solid foundation in communication acquisition
- Provides basic principles and procedures for the identification and remediation of speech, language, and hearing impairments through a unique combination of course, clinical, and research experience
- Introduces students to the professional roles and responsibilities associated with the disciplines of speech-language pathology and audiology through coursework and supervised clinical practicums
- Involves and exposes students to local, state, and national associations, related professional organizations, and continuing education opportunities
- Develops a student’s ability to think critically and reflectively to express oneself orally and in writing in a professional manner
- Develops a student’s ability to adjust communication style to meet the needs of the listener/reader, as well as the situation
- Guides students through completion of a senior-year research-based capstone project
- Offers student participation in community-based service learning events

A wide variety of unique, individualized, and hands-on learning experiences that further prepare CSD majors for graduate study or a vocation immediately post-graduation:
- Augie Choice funds of $2,000 are available for students to participate in:
  - Internships—in our on-campus Center for Speech, Language, and Hearing, as well as internships in local, regional, national, and international centers and agencies
  - Research—in Senior Inquiry that requires all CSD majors to complete a substantial research project while being mentored by a faculty member
  - International Study—in a wide range of study-away programs that circle the globe

- The Quad Cities is our learning laboratory, where as part of co-curricular outreach and course-linked service learning requirements, our majors provide service for several agencies that serve children, individuals with disabilities, and the aging population
- Our pre-professional chapter of the National Student Speech-Language-Hearing Association affords CSD majors with numerous opportunities to become involved in professional, political, and academic issues of relevance to future speech-language pathologists and audiologists, engage in several major fundraisers each year, and complete several hours of communication-related service projects throughout the academic year

### Development, Promotion, and Sales of Clinical, Educational, and Healthcare Materials

- Health-related public information
- Educational materials, textbooks, reference books
- Assessment and intervention materials and software
- Hearing aids and assistive listening devices
- Voice recognition and production systems
- Accommodations for individuals with disabilities

### Education

- Special educator
- General educator
- Early intervention specialist
- School counselor
- School administrator
- Teacher of the deaf and hard of hearing
- Special education teacher
- Preschool teacher
- Teacher of ELL (English Language Learners)

### Related Fields

- Rehabilitation counselor
- Group home staff
- Community outreach worker
- Public policy specialist
- Employment search firm
- Education or health law
- Marketing and sales
- Manager, executive, and administrator
- Social worker
- Family services
- Advocate for individuals with disabilities
- Autism specialist
- ABA therapist
- Vision/orientation/mobility therapist
- Art therapist
- Movement therapist
- Interpreter for the deaf
- Forensic scientist

### Entertainment and Media

- Assisting professional voice users and vocalists
- Acting coach to develop dialects, mannerisms, and simulate disorders
CSD Academic Program Notice of Nondiscrimination

Augustana College is committed to fostering a safe, inclusive environment free from all forms of discrimination and harassment. Our Policy Against Discrimination and Harassment describes your right to freedom from discrimination and harassment on the basis of race, color, religion, national origin, service in uniformed service, veteran status, sex, age, political ideas, marital or family status, pregnancy, disability, genetic information, gender identity, gender expression, sexual orientation, or any other classification protected by law. Consistent with state and federal requirements, our Policy against Sex Discrimination specifically prohibits discrimination on the basis of sex and gender, including sexual assault, sexual exploitation, sexual harassment, stalking, and relationship violence. To find resources available to you or anyone on campus who has experienced discrimination or harassment, please visit https://www.augustana.edu/student-life/TitleIX/discrimination-policy.

Complaints of discrimination in the Communication Sciences and Disorders Department can be made to Dr. Kathy Jakielski, Department Chair, who can be reached at (309) 794-7386 or via email at kathyjakielski@augustana.edu. Complaints also can be forwarded to the college’s Title IX Chief Officer and Director of Human Resources, Ms. Laura Ford, who has been designated to handle inquiries regarding the nondiscrimination policies can be reached at (309) 794-7452 or via email at lauraford@augustana.edu.

Course Requirements for the Bachelor of Arts in CSD Degree

Major Coursework Required (38 credits)
- CSD-110 Introduction to Communication Sciences & Disorders (4 credits)
- CSD-205 Anatomy, Physiology, & Science of Speech (4 credits)
- CSD-210 Anatomy, Physiology, & Science of Hearing (4 credits)
- CSD-215 Phonetics (4 credits)
- CSD-220 Speech and Language Development (4 credits)
- CSD-305 Speech Sound Disorders (4 credits)
- CSD-310 Language and Literacy Disorders [D] (4 credits)
- CSD-315 Audiology (4 credits)
- CSD-405 Aural Rehabilitation (2 credits)
- CSD-410 Neural Bases of Human Communication (4 credits)

Research Coursework Required (6 credits)
- CSD-480 SI–Research Methods (4 credits)
- CSD-490 SI–Research Writing (2 credits) OR Equivalent SI in another major (CSD approval required)

Internships Required (0 credits)
- CSD-415 Community Practicum 1
- CSD-420 Community Practicum 2
- OR
- CSD-425 Clinical Practicum 1
- CSD-430 Clinical Practicum 2

Supporting Coursework Required (20 credits)
- ENGL-205 Linguistics (4 credits)
- PSYC-212 Human Development (4 credits)
- STATS Any statistics course [Q] (4 credits)
- BIOL-130/140 Recommended; OR any BIOL course related to human or animal sciences [PN] (4 credits)
- PHYS-115 Recommended; OR -152; -121 with math score >840; -211 with calculus; -111 J-term [PN] (4 credits)
- OR
- CHEM-115 Recommended; J-Term course; OR any CHEM course [PN] (4 credits)

Optional Coursework
- CSD-105 Sign Language (1 credit)

Study-Abroad Coursework Taught by CSD Faculty
- ISS-350 Ethical Service Learning (4 credits)
- ISS-352 International Service Practicum [PH, G, SL when combined with ISS-350] (2 credits)

Non-Major Coursework
- CSD-100 Human Communication and Disorders [PH] (4 credits)

Bachelor of Arts in CSD Course Descriptions

Academic Coursework

CSD-100, Human Communication and Its Disorders, 4 credits, PH
Augustana Student Learning Outcomes: Disciplinary Knowledge, Critical Thinking, Intercultural Competency

Course Description: The focus of this course is to examine linguistic, behavioral, physiological, and multicultural aspects of human communication and its disorders. Methods for observing communication behaviors and identifying disordered communication will be examined. Etiologies characteristics for a range of communication disorders will be presented. Non-CSD majors only.

CSD-105, Sign Language, 1 credit
Augustana Student Learning Outcomes: Disciplinary Knowledge, Intercultural Competency, Communication Competency

Course Description: Comprehend and express of a basic vocabulary in sign language. English word order. Manual fingerspelling. Develop of a basic understanding of Deaf culture.

CSD-110, Introduction to Communication Sciences and Disorders, 4 credits
Augustana Student Learning Outcomes: Disciplinary Knowledge, Critical Thinking and Information Literacy, Intercultural Competency

Course Description: Students in this course will learn about human communication systems and variations in communication, including cultural differences, with emphasis on the multiple aspects of disordered communication related to speech, language, and hearing deficits. Specific communication disorders will be examined. Students will also learn about the roles and responsibilities of the professions in the field of Communication Sciences and Disorders. CSD majors only.

CSD-205, Anatomy, Physiology, and Science of Speech, 4 credits
Augustana Student Learning Outcomes: Disciplinary Knowledge, Critical Thinking

Course Description: The primary objective of the course is to provide students with an understanding of how humans produce speech. This will lead into the study of the human speech mechanism and how it works. The study of speech encompasses an array of interrelated scientific disciplines, including mathematics, physics, psychology, biology, medicine, and communication sciences and disorders. In this course, students will study the multidisciplinary nature of speech as we explore the topics of respiration, phonation, articulation, and resonance. Course includes a weekly lab.

CSD-210, Anatomy, Physiology, and Science of Hearing, 4 credits
Augustana Student Learning Outcomes: Disciplinary Knowledge, Quantitative Literacy, Communication Competency

Course Description: The primary objective of this course is to introduce students to the hearing mechanism by examining its structure and function, and the acoustical properties of sound. We will discuss fundamental principles and theories of sound waves and their propagation in space, and will learn how sound is measured by solving problems using the decibel. We will discuss structures of the peripheral and central auditory system and the vestibular system, and explain their functions. Students will also differentiate the acoustical characteristics of sound (e.g., pitch vs. loudness) and explain how they contribute to auditory perception. Finally, we will discuss audio systems, including the functions of audio devices and how they process auditory signals.

CSD-215, Phonetics, 4 credits
Augustana Student Learning Outcomes: Disciplinary Knowledge, Critical Thinking and Information Literacy, Communication Competency

Course Description: The primary objective of this course is to provide students with the science of speech production and perception. Students will learn the mechanisms involved in segmental and suprasegmental production in a variety of the world's languages. The study of these mechanisms includes the study of respiration,
phonation, articulation, and resonation. The study of speech acoustics and acoustic analysis will be introduced and students will learn how to conduct basic analyses. Students will begin to learn the phonology of speech sounds in American English. Students also will learn to phonetically transcribe normal and disordered speech using symbols from the International Phonetic Alphabet. Development of both the art and science of IPA transcription will be fostered in this class. Course includes a weekly lab.

CSD-220, Speech and Language Development, 4 credits

*Augustana Student Learning Outcomes:* Disciplinary Knowledge, Critical Thinking, Quantitative Literacy, Intercultural Competency, Communication Competency, Intellectual Curiosity

*Course Description:* The primary objective of this course is to explore multiple aspects of speech and language developmental milestones and language development theories. Students will discover distinctions between communication, speech, and language phenomena. They will consider how and why humans develop language and how factors such as socioeconomic status, intelligence, and language difference influence language and speech development. Typical speech and language development norms will be used to inform assessment and intervention decisions for children with atypical communication development. Weekly lab component will allow students to quantify, describe, and analyze language data.

CSD-305, Speech Sound Disorders, 4 credits

*Augustana Student Learning Outcomes:* Disciplinary Knowledge, Critical Thinking and Information Literacy, Communication Competency, Creative Thinking, Ethical Citizenship

*Course Description:* The primary objective of the course is to provide students with an understanding of the various disorders of speech that can affect individuals throughout the lifespan. We only briefly will review normal speech development, and then will spend a considerable amount of time learning how to assess individuals with speech disorders. Following assessment, we will talk about intervention issues. A variety of special populations in which individuals exhibit a high incidence of speech disorders also will be presented, and we will explore multicultural issues related to assessment and intervention of disorders and differences of speech. We will discuss competing theories of speech acquisition, while learning how to evaluate theoretical approaches in assessment and intervention. Course includes a weekly lab.

CSD-310, Language and Literacy Disorders, 4 credits, D

*Augustana Student Learning Outcomes:* Disciplinary Knowledge, Critical Thinking, Quantitative Literacy, Intercultural Competency, Communication Competency, Intellectual Curiosity

*Course Description:* The primary objective of this course is for students to gain understanding of the types, causes, and possible characteristics of child oral language and literacy disorders. Students will connect applied and theoretical linguistics and develop evidence-based procedures to identify, assess, and generate functional and measurable goals and related intervention plans for children with language disorders. They will use standardized test and qualitative language data to describe language development in children with language disorders and write professional clinical reports for children with disordered oral or written language. Students will apply the study of typical language development to children with language and literacy disorders. Throughout the course, concepts of the language-cognition relationship, special issues pertaining to culturally and linguistically diverse populations, and service delivery in various pediatric settings also will be explored. Prerequisite: CSD-220.

CSD-315, Audiology, 4 credits

*Augustana Student Learning Outcomes:* Disciplinary Knowledge, Critical Thinking, Communication Competency

*Course Description:* The primary objective of this course is to introduce students to the field of audiology that includes diagnosis and treatment of hearing disorders. We will also discuss the roles and responsibilities of hearing healthcare professionals working with patients with hearing loss, and summarize the important technologies that are used to assess hearing. Students will perform basic hearing testing and interpret their results through hands-on labs. We will discuss hearing disorders as they affect hearing and vestibular function, and investigate the effectiveness of treatments available to address hearing and vestibular dysfunction. A special emphasis will be placed on multicultural issues, including the Deaf culture.
CSD-405, Aural Rehabilitation, 2 credits  
*Augustana Student Learning Outcomes*: Disciplinary Knowledge, Critical Thinking, Intercultural Competency, Ethical Citizenship

*Course Description*: The primary objective of this course is to enable students to thoughtfully address questions and issues related to aural habilitation and aural rehabilitation. Emphasis will be placed on total communication, defined as the use of all available modalities (auditory, verbal, sign language/visual communication systems) to teach language and speech to individuals with hearing impairment. Students will also learn about relevant legislation related to the D/deaf and hard of hearing population. Course includes a field trip to the Illinois School for the Deaf.

CSD-410, Neural Bases of Human Communication, 4 credits  
*Augustana Student Learning Outcomes*: Critical Thinking, Communication Competency, Creative Thinking

*Course Description*: The primary objective of this course is to identify the structures of the central and peripheral nervous systems of the body, and how they connect and contribute to communication impairments. Students will apply principles governing brain function through case studies. Students will also be able to describe how development of neural systems occurs and how abnormalities produce developmental disabilities and neurological disorders affecting communication. We will review the major parts of a nerve cell and describe how electrical signals are conducted through the nervous system. Students will explain how blood is circulated in the brain and how involvement of cerebrovascular systems results in damage to the brain.

Research Coursework

CSD-480, Senior Inquiry–Research Methods, 4 credits  
*Augustana Student Learning Outcomes*: Disciplinary Knowledge, Critical Thinking and Information Literacy, Quantitative Literacy, Communication Competency, Ethical Citizenship

*Course Description*: The primary objective of this course is to examine the various designs of scientific methods employed in CSD research, including clinical trials and single-subject designs, and review the importance of evidence-based practice in CSD. This course is foundational for a graduate-level research methods course. We will also study the research process and discuss issues related to population sampling, adequate data collection, and statistical analyses. An emphasis will be placed on protection of human participants and research ethics. We will practice scientific writing in CSD, as well as presenting research in a professional format. Development of a research question or topic will be the culminating product.

CSD-490, Senior Inquiry–Research Writing, 2 credits  
*Augustana Student Learning Outcomes*: Disciplinary Knowledge, Critical Thinking and Information Literacy, Communication Competency, Intellectual Curiosity

*Course Description*: The focus of this course is to provide students with hands-on experience in the research process and advanced scientific writing. Students will conduct an extensive literature search and compose a scientific paper on a topic of narrow focus or develop a research study proposal based on the research question or topic developed in CSD-480. The course will culminate in a professional presentation of research. Students also will produce a reflective essay.

Clinical Coursework

CSD-415 and CSD-420 OR CSD-425 and CSD-430, Internship, 0 credits  
*Augustana Student Learning Outcomes*: Critical Thinking and Information Literacy, Collaborative Leadership, Intercultural Competency, Communication Competency, Creative Thinking, Intellectual Curiosity

*Course Description*: Students complete two community or clinical practicums. Determined on an individual basis in conference with advisor. Community Practicum students intern in a local agency to explore vocations outside of CSD, working primarily with CORE throughout the experience. Clinical Practicum students intern in our on-campus Center for Speech, Language, and Hearing. Clinical Practicum students learn in weekly seminars about professional practice issues, evidence-based practice, clinical documentation, the clinical supervision process, the ASHA Code of Ethics and Scope of Practice, and intervention planning. Prerequisite: Approval by CSD advisor.
Undergraduate Internships in CSD Major

In addition to completing coursework in the major, each student becomes an active participant in the clinical program all four years in the major.

**First and Sophomore Years**
Students observe diagnostic and intervention sessions at the Augustana College Center for Speech, Language, and Hearing. Students also are encouraged to observe speech-language pathologists and audiologists in their home and QCA communities and complete observations using Master Clinician Network.

**Junior Year**
Students continue to observe diagnostic and intervention sessions at our on-campus center. In Spring Semester, students work as clinical mentees for one client, assisting a senior or graduate student clinician under the supervision of a certified and licensed CSD faculty member.

**Senior Year**
In the senior year, CSD majors have a choice of internship possibilities. Students decide to take a traditional path or an alternate path, as explained below.

Traditional Path senior CSD majors desiring to enter vocations in speech-language pathology or audiology complete fall and spring semester clinical internships in our on-campus Center for Speech, Language, and Hearing, working with clients who present with a variety of communication disorders. While students address the numerous challenges facing their clients in intervention, they are supervised closely by certified and licensed clinical CSD faculty. Please note that admission to Clinical Practicum is granted only if a student has a minimum overall GPA of 3.0 at the time each experience begins. Admission to the clinical internship is by written application submitted to the Center Director in the preceding term. More detailed information regarding these requirements can be found on the following page.

Alternate Path senior CSD majors desiring to explore vocations in another discipline typically complete a community internship in a local agency. Students work with their advisor and CORE staff to identify an internship placement that will help them explore vocations of interest. A member in CORE supervises students throughout their community-based internships.
Policies and Prerequisites for Undergraduate Clinical Practicum
Augustana College Center for Speech, Language, and Hearing

Prior to enrolling in clinic coursework (CSD-425 or CSD-430), students must complete the following prerequisites:

- **3.0 Cumulative Grade Point Average**: Students must achieve a 3.0 cumulative GPA to enroll in clinical internship courses or graduate clinical seminars.

- **Observation Hours**: Student clinicians must complete 25 observation hours beyond hours that are accrued as part of their Augustana CSD coursework. Prospective student clinicians must turn in to the Center Director fully completed RECORD OF UNDERGRADUATE SUPERVISED OBSERVATION HOURS and DIRECT OBSERVATION forms by the Tuesday of week 2 of the term in which the student is enrolled in CSD-425. Speech-language pathologists and audiologists whom are observed must hold the ASHA Certificate of Clinical Competence (CCC). Students are responsible for securing their own observation sites and also are responsible for meeting all related requirements that individual sites have (e.g., fingerprinting, reading about site-specific regulations, etc.). Students observers should dress and behave professionally at all observation sites. They should also be punctual and engaging and demonstrate strong communication skills. Students may complete observations in-person or through Master Clinician Network.

Note that students will receive credit for additional hours for observations completed as part of coursework.

- **Blood Borne Pathogens Training**: Prospective student clinicians must complete online blood borne pathogens training and pass a related quiz. The Clinic Manager will email each student a link to follow to complete this requirement.

- **Background Check**: Prior to week 1 of their first semester of clinical practicum, students must complete a background check by submitting payment and completing documents related to this requirement. The Clinic Manager will email each student a link to follow to complete this requirement. Students who have been convicted of felonies, who have violations that relate to children, or who have a record that would prevent them from securing professional licensure for speech-language pathology or audiology practice in the state of Illinois will not be allowed to complete a clinical internship.

- **Safe Interactions with Children**: Prospective clinicians must annually complete online Eventfli safe interactions with children training and pass a related quiz. The Clinic Manager will email each student a link to follow to complete this requirement.

- **HIPAA**: Prospective clinicians must annually complete online HIPAA training and pass a related quiz. The Clinic Manager will email each student a link to follow to complete this requirement.

- **Clinical Mentoring Experience**: One semester prior to enrolling in the first clinic internship course, students must serve for at least one semester as a mentee to a senior clinician for one client. Mentees are expected to increase their involvement in the clients’ sessions from the beginning to the end of the term and to follow all Center policies. Mentees who demonstrate unprofessional behavior or who do fail to demonstrate competency consistent with their level of experience may not be allowed to enroll in clinic internship.
Augustana College is committed to fostering a safe, inclusive environment free from all forms of discrimination and harassment. Our Policy Against Discrimination and Harassment describes your right to freedom from discrimination and harassment on the basis of race, color, religion, national origin, service in uniformed service, veteran status, sex, age, political ideas, marital or family status, pregnancy, disability, genetic information, gender identity, gender expression, sexual orientation, or any other classification protected by law. Consistent with state and federal requirements, our Policy against Sex Discrimination specifically prohibits discrimination on the basis of sex and gender, including sexual assault, sexual exploitation, sexual harassment, stalking, and relationship violence. To find resources available to you or anyone on campus who has experienced discrimination or harassment, please visit https://www.augustana.edu/student-life/TitleIX/discrimination-policy.

Complaints of discrimination in the Augustana Center for Speech, Language, and Hearing can be made to Dr. Allison Haskill, Center Director, who can be reached at (309) 794-7388 or via email at allihaskill@augustana.edu. Complaints also can be forwarded to the college’s Title IX Chief Officer and Director of Human Resources, Ms. Laura Ford, who has been designated to handle inquiries regarding the nondiscrimination policies can be reached at (309) 794-7452 or via email at lauraford@augustana.edu.

Find online at https://www.augustana.edu/academics/areas-of-study/communication-sciences-and-disorders/clinic.
## Required CSD Major Coursework Schedule

It is suggested strongly that a student majoring in Communication Sciences and Disorders begin coursework during fall term, first year. The typical sequence of classes is presented below.

<table>
<thead>
<tr>
<th>Year</th>
<th>Fall</th>
<th>J-Term</th>
<th>Spring</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>First Year</strong></td>

Responsibilities of Speech-Language Pathologists and Audiologists

Speech-language pathology and audiology are fascinating and diverse healthcare fields.

According to ASHA (2007), speech-language pathologists and audiologists:
• identify, assess, and provide treatment for individuals of all ages with communication disorders
• manage and supervise programs and services related to human communication and its disorders
• counsel individuals with disorders of communication, their families, caregivers, and other service providers relative to the disability present and its management
• provide consultation
• make referrals

The practice of speech-language pathology includes:
• screening, identifying, assessing, interpreting, diagnosing, rehabilitating, and preventing disorders of speech (e.g., articulation, fluency, voice) and language
• screening, identifying, assessing, interpreting, diagnosing, and rehabilitating disorders of oral-pharyngeal function (e.g., dysphagia) and related disorders
• screening, identifying, assessing, interpreting, diagnosing, and rehabilitating cognitive/communication disorders
• assessing, selecting, and developing augmentative and alternative communication systems, and providing training in their use
• providing aural rehabilitation and related counseling services to individuals with hearing losses and their families
• enhancing speech-language proficiency and communication effectiveness (e.g., accent reduction)
• screening of hearing and other factors for the purpose of speech-language evaluation and/or the initial identification of individuals with other communication disorders
The practice of audiology includes:
- facilitating the conservation of auditory system function and developing and implementing environmental and occupational hearing conservation programs
- screening, identifying, assessing, interpreting, diagnosing, preventing, and rehabilitating peripheral and central auditory system dysfunctions
- providing and interpreting behavioral and (electro) physiological measurements of auditory and vestibular functions
- selecting, fitting, and dispensing of amplification, assistive listening, and alerting devices and other systems (e.g., implantable devices), and providing training in their use
- providing aural rehabilitation and related counseling services to individuals with hearing losses and their families
- screening of speech-language and other factors affecting communication function for the purposes of an audiologic evaluation and/or initial identification of individuals with other communication disorders

References

Additional Information

Speech-language pathologists and audiologists must hold an advanced degree. They must obtain the Certificate of Clinical Competence from the American Speech-Language-Hearing Association and a state license where applicable. Also, professionals working in the public schools must meet certification requirements of the State Board of Education in the state in which they are practicing.

To obtain more information about the fields of speech-language pathology and audiology, go to www.asha.org. From this home page, you also will find pages developed especially for students.
The two semester undergraduate clinical practicum experiences are an integral part of the Bachelor of Arts in CSD Program. The program has procedures that reflect the standards of the American Speech-Language-Hearing Association and the Illinois Department of Financial and Professional Regulation. The Department’s clinical and academic faculty oversee and are responsible for students in the practicum program. It therefore is imperative for prospective student clinicians to demonstrate competency in academic performance. Clinical practicums also require specific inter- and intra-personal, emotional, physical, moral and ethical, and compassion qualities. Faculty may disallow a prospective student from beginning or continuing in the internship program if he or she is not able to satisfy any of the functions described in this document.

CSD faculty and staff members are committed to adhering to the Americans with Disabilities Act and are eager to provide necessary accommodations to create an optimal clinical experience. Students with documented disabilities are encouraged to contact Augustana’s Office of Disabilities Services to facilitate the accommodations process.

Prospective graduate and undergraduate clinicians must possess the following skills and meet the following requirements.

**Cognitive and Academic Skills and Requirements**

- To enroll in subsequent graduate Practicum courses, students must receive a practicum grade of B- or higher.
- Demonstrate the potential to learn and assimilate theoretical and clinical information; be able to make connections between coursework and engage in evidence based clinical practice.
- Synthesize, analyze, and apply concepts from coursework in CSD and other disciplines.
- Write in English professional clinical reports that integrate suggestions from supervisors.
- Collect, analyze, and respond to data from intervention sessions; write SOAP notes.

**Physical Skills and Requirements**

- Actively participate in class, clinical, or related activities for up to three-hour blocks of time with minimal breaks.
- Move independently to, from, and within the clinic setting.
- Maintain hygiene appropriate for a professional clinic setting.
- Independently, or through augmented means manage standard use of clinical equipment and materials including test easels, clipboards, recording equipment, computer applications, and audioligic instrumentation.
- Use developmentally appropriate, evidence-based procedures to carry out a client’s individual or group intervention plan; this may involve working on the floor or in other natural environments for pediatric clients or sitting at a table for school-age and adult clients.
- Use appropriate paper and pencil or computer-based data collection methods.
- Be able to uphold universal precautions and respond, as trained, to limiting exposure to bloodborne pathogens.
- Visually monitor and respond appropriately to the clinical environment.
- Create a safe clinical environment for oneself and one’s client(s) by using appropriate functional behavior plans and responding to clients who may be physically aggressive or self-injurious.
- Provide specific, accurate feedback to clients about speech sound and linguistic productions; consistent use of assistive listening devices, FM systems, or hearing aids may be requested for clinicians who are unable to pass a 20 dB hearing screening at for 250-8000 Hz.
Behavioral, Professional, Ethical, and Interpersonal Skills and Requirements

- Pass a background check. Students who have a history of crimes committed against children will not be allowed to complete the clinical internship sequence. Students with non-child related felony convictions will be counseled individually about their ability to complete the clinical sequence. Students with convictions or charges that would prevent state licensure will be counseled (e.g., child support violations).
- Maintain appropriate emotional and physical health to be able to complete clinical and professional responsibilities.
- Maintain appropriate and professional relationships with clients, classmates, supervisors, and Center staff. This involves showing discretion in communicating via social networking websites with clients and maintaining professional interactions with clients in and outside the Center.
- Maintain composure and professional interactions in stressful and sometimes emotionally charged situations.
- Comply with ASHA’s Code of Ethics.
- Communicate effectively in writing, on the telephone, and in person with a variety of communication partners.
- Demonstrate emerging professional qualities commensurate with one’s level of training and adhere to legal, administrative and regulatory policies (e.g., follow the Center’s dress code, complete paperwork, maintain HIPAA, comply with bloodborne pathogens training, etc.).
- Speak English intelligibly and have the ability to model production of all English phonemes, voice and language structures.
- Be an active team member with one’s supervisor and fellow clinicians.
- Regularly attend clinic class and meet internship deadlines in a timely manner.
- Understand and respect authority.
- Interpret supervisors’, clients’ and clients’ families’ linguistic and nonlinguistic communications.
- Be prepared for clinical sessions by meeting regularly with your supervisor, completing related reading, reviewing case files, responding to supervisory feedback, and communicating with your clients and Center staff.
- Be respectful of the Center’s facilities by allowing sufficient time to set up and clean up your sessions. Use check-out procedures to reserve intervention or testing materials owned by the Center or Clinical Supervisors. Participate in weekly Center cleaning activities and notify the Clinic Coordinator or Center Director if materials need repair or replacing.
- Be able to complete multiple tasks simultaneously and manage time effectively.
- Consistently build skills throughout the internship program, moving toward independent performance.

I ________________________________________ have read this document and understand that my grades for CSD-425 and CSD-430 will, in large part, be based on these skills. I also understand that my failure to demonstrate competency in essential skills/functions may result in me not being able to complete a clinical internship, a requirement for the SLP graduate program. I will notify faculty of any changes in my ability to meet these functions/skills.

Signature: ___________________________________________ Date: ___________________
Introduction
The Council for Clinical Certification in Audiology and Speech-Language Pathology (CFCC) is a semi-autonomous credentialing body of the American Speech-Language-Hearing Association (ASHA). The charges to the CFCC are to define the standards for clinical certification; to apply those standards in granting certification to individuals; to have final authority to withdraw certification in cases where certification has been granted on the basis of inaccurate information; and to administer the certification maintenance program.

A Practice and Curriculum Analysis of the Profession of Speech-Language Pathology was conducted in 2017 under the auspices of the Council on Academic Accreditation in Audiology and Speech-Language Pathology (CAA) and the CFCC. The survey analysis was reviewed by the CFCC, and the following standards were developed to better fit current practice models.

The 2020 Standards and Implementation Procedures for the Certificate of Clinical Competence in Speech-Language Pathology (CCC-SLP) go into effect on January 1, 2020. View the SLP Standards Crosswalk [PDF] and consult Changes to Speech-Language Pathology Standards for more specific information on how the standards will change.

Terminology
Clinical educator: Refers to and may be used interchangeably with supervisor, clinical instructor, and preceptor
Individual: Denotes clients, patients, students, and other recipients of services provided by the speech-language pathologist.

Citation

The Standards for the CCC-SLP are shown in bold. The CFCC implementation procedures follow each standard.

- Standard I—Degree
- Standard II—Education Program
- Standard III—Program of Study
- Standard IV—Knowledge Outcomes
- Standard V—Skills Outcomes
- Standard VI—Assessment
- Standard VII—Speech-Language Pathology Clinical Fellowship
- Standard VIII—Maintenance of Certification

Standard I: Degree
The applicant for certification (hereafter, “applicant”) must have a master’s, doctoral, or other recognized post-baccalaureate degree.
Standard II: Education Program

All graduate coursework and graduate clinical experience required in speech-language pathology must have been initiated and completed in a speech-language pathology program accredited by the Council on Academic Accreditation in Audiology and Speech-Language Pathology (CAA).

Implementation: The graduate program of study must be initiated and completed in a CAA-accredited program or a program with candidacy status for CAA accreditation. The applicant’s program director or official designee must complete and submit a program director verification form. Applicants must submit an official graduate transcript or a letter from the registrar that verifies the date on which the graduate degree was awarded. The official graduate transcript or letter from the registrar must be received by the ASHA National Office no later than one (1) year from the date on which the application was received. Verification of the applicant’s graduate degree is required before the CCC-SLP can be awarded.

Applicants educated outside the United States or its territories must submit documentation that coursework was completed in an institution of higher education that is regionally accredited or recognized by the appropriate regulatory authority for that country. In addition, applicants outside the United States or its territories must meet each of the standards that follow.

Standard III: Program of Study

The applicant must have completed a program of study (a minimum of 36 semester credit hours at the graduate level) that includes academic coursework and supervised clinical experience sufficient in depth and breadth to achieve the specified knowledge and skills outcomes stipulated in Standards IV-A through IV-G and Standards V-A through V-C.

Implementation: The minimum of 36 graduate semester credit hours must have been earned in a program that addresses the knowledge and skills pertinent to the ASHA Scope of Practice in Speech-Language Pathology.

Standard IV: Knowledge Outcomes

Standard IV-A

The applicant must have demonstrated knowledge of statistics as well as the biological, physical, and social/behavioral sciences.

Implementation: Coursework in statistics as well as in biological, physical, and social/behavioral sciences that is specifically related to communication sciences and disorders (CSD) may not be applied for certification purposes to this category unless the course fulfills a general the university requirement in the statistics, biology, physical science, or chemistry areas.

Acceptable courses in biological sciences should emphasize a content area related to human or animal sciences (e.g., biology, human anatomy and physiology, neuroanatomy and neurophysiology, human genetics, veterinary science). Chemistry and physics are important for the foundational understanding of the profession of speech-language pathology. For all applicants who apply beginning January 1, 2020, courses that meet the physical science requirement must be in physics or chemistry. Program directors must evaluate the course descriptions or syllabi of any courses completed prior to students entering their programs to determine if the content provides foundational knowledge in physics or chemistry. Acceptable courses in social/behavioral sciences should include psychology, sociology, anthropology, or public health. A stand-alone course in statistics is required. Coursework in research methodology in the absence of basic statistics cannot be used to fulfill this requirement.

Standard IV-B

The applicant must have demonstrated knowledge of basic human communication and swallowing processes, including the appropriate biological, neurological, acoustic, psychological, developmental, and
linguistic and cultural bases. The applicant must have demonstrated the ability to integrate information pertaining to normal and abnormal human development across the life span.

Standard IV-C
The applicant must have demonstrated knowledge of communication and swallowing disorders and differences, including the appropriate etiologies, characteristics, and anatomical/physiological, acoustic, psychological, developmental, and linguistic and cultural correlates in the following areas:

- Speech sound production, to encompass articulation, motor planning and execution, phonology, and accent modification
- Fluency and fluency disorders
- Voice and resonance, including respiration and phonation
- Receptive and expressive language, including phonology, morphology, syntax, semantics, pragmatics (language use and social aspects of communication), prelinguistic communication, paralinguistic communication (e.g., gestures, signs, body language), and literacy in speaking, listening, reading, and writing
- Hearing, including the impact on speech and language
- Swallowing/feeding, including (a) structure and function of orofacial myology and (b) oral, pharyngeal, laryngeal, pulmonary, esophageal, gastrointestinal, and related functions across the life span
- Cognitive aspects of communication, including attention, memory, sequencing, problem solving, and executive functioning
- Social aspects of communication, including challenging behavior, ineffective social skills, and lack of communication opportunities
- Augmentative and alternative communication modalities

Implementation: It is expected that coursework addressing the professional knowledge specified in this standard will occur primarily at the graduate level.

Standard IV-D
For each of the areas specified in Standard IV-C, the applicant must have demonstrated current knowledge of the principles and methods of prevention, assessment, and intervention for persons with communication and swallowing disorders, including consideration of anatomical/physiological, psychological, developmental, and linguistic and cultural correlates.

Standard IV-E
The applicant must have demonstrated knowledge of standards of ethical conduct.

Implementation: The applicant must have demonstrated knowledge of the principles and rules of the current ASHA Code of Ethics.

Standard IV-F
The applicant must have demonstrated knowledge of processes used in research and of the integration of research principles into evidence-based clinical practice.

Implementation: The applicant must have demonstrated knowledge of the principles of basic and applied research and research design. In addition, the applicant must have demonstrated knowledge of how to access sources of research information and must have demonstrated the ability to relate research to clinical practice.
Standard IV-G
The applicant must have demonstrated knowledge of contemporary professional issues.

Implementation: The applicant must have demonstrated knowledge of professional issues that affect speech-language pathology. Issues include trends in professional practice, academic program accreditation standards, ASHA practice policies and guidelines, educational legal requirements or policies, and reimbursement procedures.

Standard IV-H
The applicant must have demonstrated knowledge of entry level and advanced certifications, licensure, and other relevant professional credentials, as well as local, state, and national regulations and policies relevant to professional practice.

Standard V: Skills Outcomes

Standard V-A
The applicant must have demonstrated skills in oral and written or other forms of communication sufficient for entry into professional practice.

Implementation: Applicants are eligible to apply for certification once they have completed all graduate-level academic coursework and clinical practicum and have been judged by the graduate program as having acquired all of the knowledge and skills mandated by the current standards.

The applicant must have demonstrated communication skills sufficient to achieve effective clinical and professional interaction with persons receiving services and relevant others. For oral communication, the applicant must have demonstrated speech and language skills in English, which, at a minimum, are consistent with ASHA's current position statement on students and professionals who speak English with accents and nonstandard dialects. In addition, the applicant must have demonstrated the ability to write and comprehend technical reports, diagnostic and treatment reports, treatment plans, and professional correspondence in English.

Standard V-B
The applicant must have completed a program of study that included experiences sufficient in breadth and depth to achieve the following skills outcomes:

1. Evaluation
   a. Conduct screening and prevention procedures, including prevention activities.
   b. Collect case history information and integrate information from clients/patients, family, caregivers, teachers, and relevant others, including other professionals.
   c. Select and administer appropriate evaluation procedures, such as behavioral observations, nonstandardized and standardized tests, and instrumental procedures.
   d. Adapt evaluation procedures to meet the needs of individuals receiving services.
   e. Interpret, integrate, and synthesize all information to develop diagnoses and make appropriate recommendations for intervention.
   f. Complete administrative and reporting functions necessary to support evaluation.
   g. Refer clients/patients for appropriate services.

2. Intervention
   a. Develop setting-appropriate intervention plans with measurable and achievable goals that meet clients’/patients’ needs. Collaborate with clients/patients and relevant others in the planning process.
   b. Implement intervention plans that involve clients/patients and relevant others in the intervention process.
   c. Select or develop and use appropriate materials and instrumentation for prevention and intervention.
d. Measure and evaluate clients'/patients’ performance and progress.
e. Modify intervention plans, strategies, materials, or instrumentation as appropriate to meet the needs of clients/patients.
f. Complete administrative and reporting functions necessary to support intervention.
g. Identify and refer clients/patients for services, as appropriate.

3. Interaction and Personal Qualities
a. Communicate effectively, recognizing the needs, values, preferred mode of communication, and cultural/linguistic background of the individual(s) receiving services, family, caregivers, and relevant others.
b. Manage the care of individuals receiving services to ensure an interprofessional, team-based collaborative practice.
c. Provide counseling regarding communication and swallowing disorders to clients/patients, family, caregivers, and relevant others.
d. Adhere to the ASHA Code of Ethics, and behave professionally.

Implementation: The applicant must have acquired the skills listed in this standard and must have applied them across the nine major areas listed in Standard IV-C. These skills may be developed and demonstrated through direct clinical contact with individuals receiving services in clinical experiences, academic coursework, labs, simulations, and examinations, as well as through the completion of independent projects.

The applicant must have obtained a sufficient variety of supervised clinical experiences in different work settings and with different populations so that the applicant can demonstrate skills across the ASHA Scope of Practice in Speech-Language Pathology. Supervised clinical experience is defined as clinical services (i.e., assessment/diagnosis/evaluation, screening, treatment, report writing, family/client consultation, and/or counseling) related to the management of populations that fit within the ASHA Scope of Practice in Speech-Language Pathology.

These experiences allow students to:

- interpret, integrate, and synthesize core concepts and knowledge;
- demonstrate appropriate professional and clinical skills; and
- incorporate critical thinking and decision-making skills while engaged in prevention, identification, evaluation, diagnosis, planning, implementation, and/or intervention.

Supervised clinical experiences should include interprofessional education and interprofessional collaborative practice, and should include experiences with related professionals that enhance the student’s knowledge and skills in an interdisciplinary, team-based, comprehensive service delivery model.

Clinical simulations (CS) may include the use of standardized patients and simulation technologies (e.g., standardized patients, virtual patients, digitized mannequins, immersive reality, task trainers, computer-based interactive). These supervised experiences can be synchronous simulations (real-time) or asynchronous (not concurrent in time) simulations.

Clinical educators of clinical experiences must hold current ASHA certification in the appropriate area of practice during the time of supervision. The supervised activities must be within the ASHA Scope of Practice in Speech-Language Pathology in order to count toward the student’s ASHA certification requirements.

Standard V-C

The applicant must complete a minimum of 400 clock hours of supervised clinical experience in the practice of speech-language pathology. Twenty-five hours must be spent in guided clinical observation, and 375 hours must be spent in direct client/patient contact.
Implementation: Guided clinical observation hours generally precede direct contact with clients/patients. Examples of guided observations may include but are not limited to the following activities: debriefing of a video recording with a clinical educator who holds the CCC-SLP, discussion of therapy or evaluation procedures that had been observed, debriefings of observations that meet course requirements, or written records of the observations. It is important to confirm that there was communication between the clinical educator and observer, rather than passive experiences where the student views sessions and/or videos. It is encouraged that the student observes live and recorded sessions across settings with individuals receiving services with a variety of disorders and completes debriefing activities as described above.

The observation and direct client/patient contact hours must be within the ASHA Scope of Practice in Speech-Language Pathology and must be under the supervision of a qualified professional who holds a current ASHA certification in the appropriate practice area. Guided clinical supervision may occur simultaneously during the student’s observation or afterwards through review and approval of the student’s written reports or summaries. Students may use video recordings of client services for observation purposes. Applicants should be assigned practicum only after they have acquired a base of knowledge sufficient to qualify for such experience. Only direct contact (e.g., the individual receiving services must be present) with the individual or the individual's family in assessment, intervention, and/or counseling can be counted toward practicum. When counting clinical practicum hours for purposes of ASHA certification, only the actual time spent in sessions can be counted, and the time spent cannot be rounded up to the nearest 15-minute interval.

Up to 20% (i.e., 75 hours) of direct contact hours may be obtained through CS methods. Only the time spent in active engagement with CS may be counted. CS may include the use of standardized patients and simulation technologies (e.g., standardized patients, virtual patients, digitized mannequins, immersive reality, task trainers, computer-based interactive). Debriefing activities may not be included as clinical clock hours.

Although several students may observe a clinical session at one time, clinical practicum hours should be assigned only to the student who provides direct services to the individual receiving services or the individual's family. Typically, only one student at a time should be working with a client in order to count the practicum hours. Several students working as a team may receive credit for the same session, depending on the specific responsibilities that each student is assigned when working directly with the individual receiving services. The applicant must maintain documentation of their time spent in supervised practicum, and this documentation must be verified by the program in accordance with Standards III and IV.

Standard V-D
At least 325 of the 400 clock hours of supervised clinical experience must be completed while the applicant is enrolled in graduate study in a program accredited in speech-language pathology by the CAA.

Implementation: A minimum of 325 clock hours of supervised clinical practicum must be completed while the student is enrolled in the graduate program. At the discretion of the graduate program, hours obtained at the undergraduate level may be used to satisfy the remainder of the requirement.

Standard V-E
Supervision of students must be provided by a clinical educator who holds ASHA certification in the appropriate profession, who has the equivalent of a minimum of 9 months of full-time clinical experience, and who has completed a minimum of 2 hours of professional development in clinical instruction/supervision after being awarded ASHA certification.

The amount of direct supervision must be commensurate with the student's knowledge, skills, and experience; must not be less than 25% of the student's total contact with each client/patient; and must take
place periodically throughout the practicum. Supervision must be sufficient to ensure the welfare of the individual receiving services.

Implementation: Effective January 1, 2020, supervisors for ASHA certification must complete 2 hours of professional development/continuing education in clinical instruction/supervision. The professional development/continuing education must be completed after being awarded ASHA certification and prior to the supervision of a student. Direct supervision must be in real time. A clinical educator must be available and on site to consult with a student who is providing clinical services to the clinical educator’s client. Supervision of clinical practicum is intended to provide guidance and feedback and to facilitate the student’s acquisition of essential clinical skills.

In the case of CS, asynchronous supervision must include debriefing activities that are commensurate with a minimum of 25% of the clock hours earned for each simulated individual receiving services.

Standard V-F

Supervised practicum must include experience with individuals across the life span and from culturally/linguistically diverse backgrounds. Practicum must include experience with individuals with various types and severities of communication and/or related disorders, differences, and disabilities.

Implementation: The applicant must demonstrate direct clinical experiences with individuals in both assessment and intervention across the lifespan from the range of disorders and differences named in Standard IV-C.

Standard VI: Assessment

The applicant must have passed the national examination adopted by ASHA for purposes of certification in speech-language pathology.

Implementation: Results of the Praxis® Examination in Speech-Language Pathology must be submitted directly to ASHA from the Educational Testing Service (ETS). The certification standards require that a passing exam score be earned no earlier than 5 years prior to the submission of the application and no later than 2 years following receipt of the application. If the exam is not successfully passed and reported within the 2-year application period, the applicant's certification file will be closed. If the exam is passed or reported at a later date, then the applicant will be required to reapply for certification under the standards in effect at that time.

Standard VII: Speech-Language Pathology Clinical Fellowship

The applicant must successfully complete a Speech-Language Pathology Clinical Fellowship (CF).

Implementation: The CF experience may be initiated only after completion of all graduate credit hours, academic coursework, and clinical experiences required to meet the knowledge and skills delineated in Standards IV and V. The CF experience must be initiated within 24 months of the date on which the application for certification is received. Once the CF has been initiated, it must be completed within 48 months of the initiation date. For applicants completing multiple CFs, all CF experiences related to the application must be completed within 48 months of the date on which the first CF was initiated. Applications will be closed for CFs that are not completed within the 48-month timeframe or that are not submitted to ASHA within 90 days after the 48-month timeframe. The Clinical Fellow will be required to reapply for certification and must meet the standards in effect at the time of re-application. CF experiences more than 5 years old at the time of application will not be accepted.

The CF must be completed under the mentorship of a clinician who held the CCC-SLP throughout the duration of the fellowship and must meet the qualifications described in Standard VII-B. It is the Clinical Fellow’s responsibility to identify a CF mentor who meets ASHA’s certification standards. Should the certification status of the mentoring SLP change during the CF experience, the Clinical Fellow will be awarded credit only for that portion of time during which the mentoring SLP held certification. It is
incumbent upon the Clinical Fellow to verify the mentoring SLP’s status periodically throughout the CF experience. Family members or individuals related in any way to the Clinical Fellow may not serve as mentoring SLPs to that Clinical Fellow.

Standard VII-A: Clinical Fellowship Experience

The CF must consist of clinical service activities that foster the continued growth and integration of knowledge, skills, and tasks of clinical practice in speech-language pathology consistent with ASHA’s current Scope of Practice in Speech-Language Pathology. The CF must consist of no less than 36 weeks of full-time professional experience or its part-time equivalent.

Implementation: At least 80% of the Clinical Fellow’s major responsibilities during the CF experience must be in direct, in-person client/patient contact (e.g., assessment, diagnosis, evaluation, screening, treatment, clinical research activities, family/client consultations, recordkeeping, report writing, and/or counseling) related to the management process for individuals who exhibit communication and/or swallowing disabilities.

Full-time professional experience is defined as 35 hours per week, culminating in a minimum of 1,260 hours. Part-time experience should be at least 5 hours per week; anything less than that will not meet the CF requirement and may not be counted toward completion of the experience. Similarly, work in excess of 35 hours per week cannot be used to shorten the CF to less than 36 weeks.

Standard VII-B: Clinical Fellowship Mentorship

The Clinical Fellow must receive ongoing mentoring and formal evaluations by the CF mentor. Mentorship must be provided by a clinician who holds the CCC-SLP, who has the equivalent of a minimum of 9 months of full-time clinical experience, and who has completed a minimum of 2 hours of professional development/continuing education in clinical instruction/supervision after being awarded the CCC-SLP.

Implementation: Effective January 1, 2020, CF mentors for ASHA certification must complete 2 hours of professional development/continuing education in clinical instruction/supervision after being awarded the CCC-SLP and prior to mentoring the Clinical Fellow.

Direct observation must be in real time. A mentor must be available to consult with the Clinical Fellow who is providing clinical services. Direct observation of clinical practicum is intended to provide guidance and feedback and to facilitate the Clinical Fellow’s independent use of essential clinical skills.

Mentoring must include on-site, in-person observations and other monitoring activities, which may be executed by correspondence, review of video and/or audio recordings, evaluation of written reports, telephone conferences with the Clinical Fellow, or evaluations by professional colleagues with whom the Clinical Fellow works. The CF mentor and the Clinical Fellow must participate in regularly scheduled formal evaluations of the Clinical Fellow’s progress during the CF experience. The Clinical Fellow must receive ongoing mentoring and formal evaluations by the CF mentor.

The amount of direct supervision provided by the CF mentor must be commensurate with the Clinical Fellow’s knowledge, skills, and experience, and must not be less than the minimum required direct contact hours. Supervision must be sufficient to ensure the welfare of the individual(s) receiving services.

The mentoring SLP must engage in no fewer than 36 supervisory activities during the CF experience and must include 18 on-site observations of direct client contact at the Clinical Fellow’s work site (1 hour = 1 on-site observation; a maximum of six on-site observations may be accrued in 1 day). At least six on-site observations must be conducted during each third of the CF experience. On-site observations must consist of the Clinical Fellow engaging in screening, evaluation, assessment, and/or habilitation/rehabilitation activities. Mentoring must include on-site, in-person observations; however, the use of real-time, interactive video and audio conferencing technology may be permitted as a form of observation, for which pre-approval must be obtained.
Additionally, supervision must include 18 other monitoring activities. Other monitoring activities are defined as the evaluation of reports written by the Clinical Fellow, conferences between the CF mentor and the Clinical Fellow, discussions with professional colleagues of the Clinical Fellow, and so forth, and may be executed by correspondence, telephone, or reviewing of video and/or audio tapes. At least six other monitoring activities must be conducted during each third of the CF experience.

If the Clinical Fellow and their CF mentor want to use supervisory mechanisms other than those outlined above, they may submit a written request to the CFCC prior to initiating the CF. Written requests may be emailed to cfcc@asha.org or mailed to: CFCC, c/o ASHA Certification, 2200 Research Blvd. #313, Rockville, MD 20850. Requests must include the reason for the alternative supervision and a detailed description of the supervision that would be provided (i.e., type, length, frequency, etc.), and the request must be co-signed by both the Clinical Fellow and the CF mentor. On a case-by-case basis, the CFCC will review the circumstances and may or may not approve the supervisory process to be conducted in other ways. Additional information may be requested by the CFCC prior to approving any request.

Standard VII-C: Clinical Fellowship Outcomes

The Clinical Fellow must demonstrate knowledge and skills consistent with the ability to practice independently.

Implementation: At the completion of the CF experience, the applicant must have acquired and demonstrated the ability to:

- integrate and apply theoretical knowledge;
- evaluate their strengths and identify their limitations;
- refine clinical skills within the Scope of Practice in Speech-Language Pathology; and
- apply the ASHA Code of Ethics to independent professional practice.

In addition, upon completion of the CF, the applicant must demonstrate the ability to perform clinical activities accurately, consistently, and independently and to seek guidance as necessary.

The CF mentor must document and verify a Clinical Fellow's clinical skills using the Clinical Fellowship Report and Rating Form, which includes the Clinical Fellowship Skills Inventory (CFSI), as soon as the Clinical Fellow successfully completes the CF experience. This report must be signed by both the Clinical Fellow and CF mentor.

Standard VIII: Maintenance of Certification

Certificate holders must demonstrate continued professional development for maintenance of the CCC-SLP.

Implementation: Clinicians who hold the CCC-SLP must accumulate and report 30 Certification Maintenance Hours (CMHs) (or 3.0 ASHA continuing education units [CEUs]) of professional development, which must include a minimum of 1 CMH (or 0.1 ASHA CEU) in ethics during every 3-year certification maintenance interval beginning with the 2020–2022 maintenance interval.

Intervals are continuous and begin January 1 of the year following the initial awarding of certification or the reinstatement of certification. Random audits of compliance are conducted.

Accrual of professional development hours, adherence to the ASHA Code of Ethics, submission of certification maintenance compliance documentation, and payment of annual membership dues and/or certification fees are required for maintenance of certification.

If maintenance of certification is not accomplished within the 3-year interval, then certification will expire. Those who wish to regain certification must submit a reinstatement application and meet the standards in effect at the time the reinstatement application is submitted.
2020 Standards and Implementation Procedures for the
Certificate of Clinical Competence in Audiology

Effective Date: January 1, 2020

Introduction
The Council for Clinical Certification in Audiology and Speech-Language Pathology (CFCC) is a semi-
autonomous credentialing body of the American Speech-Language-Hearing Association. The charges to
the CFCC are: to define the standards for clinical certification; to apply those standards in granting
certification to individuals; to have final authority to withdraw certification in cases where certification has
been granted on the basis of inaccurate information; and to administer the certification maintenance
program.

A Practice and Curriculum Analysis of the Profession of Audiology was conducted in 2016 under the
auspices of the Council on Academic Accreditation in Audiology and Speech-Language Pathology (CAA)
and the CFCC. The survey analysis was reviewed by the CFCC, and the following standards were
developed to better fit current practice models.

The 2020 standards and implementation procedures for the Certificate of Clinical Competence in
Audiology (CCC-A) go into effect on January 1, 2020. View the Audiology Standards Crosswalk [PDF] and
consult Changes to Audiology Standards for more specific information on how the standards will change.

The Standards for the CCC-A are shown in bold. The CFCC implementation procedures follow each
standard.

- Standard I—Academic Qualifications
- Standard II—Knowledge and Skills Outcomes
- Standard III—Verification of Knowledge and Skills
- Standard IV—Examination
- Standard V—Maintenance of Certification

Standard I: Academic Qualifications
Applicants for certification must hold a doctoral degree in audiology from a program accredited by the
CAA, a program in CAA candidacy status, or equivalent.

Implementation: Verification of the graduate degree is accomplished by submitting (a) an official transcript
showing that the degree has been awarded or (b) a letter from the university registrar verifying completion
of requirements for the degree. Applicants must have graduated from a program holding CAA accreditation
or candidacy status in audiology throughout the period of enrollment.

Applicants from non–CAA-accredited programs (e.g., PhD programs, internationally educated, etc.) with a
doctoral degree and audiology coursework will have their application evaluated by the CFCC to determine
substantial equivalence to a clinical doctoral degree program accredited by the CAA. Individuals educated
outside the United States or its territories must submit official transcripts and evaluations of their degrees
and courses to verify equivalency. These evaluations must be conducted by credential evaluation services
agencies recognized by the National Association of Credential Evaluation Services (NACES). Evaluations must (a) confirm that the degree earned is equivalent to a U.S. clinical doctoral degree, (b) show that the coursework is equivalent to a CAA-accredited clinical doctoral program, (c) include a translation of academic coursework into the American semester-hour system, and (d) indicate which courses were completed at the graduate level.

**Standard II: Knowledge and Skills Outcomes**

Applicants for certification must have acquired knowledge and developed skills in the professional areas of practice as identified in Standards II A–F, as verified in accordance with Standard III.

Implementation: The knowledge and skills identified in this standard, although separated into areas of practice, are not independent of each other. The competent practice of audiology requires that an audiologist be able to integrate across all areas of practice. Therefore, assessments used to verify knowledge and skills acquisition must require that the candidate for certification demonstrate integration of the knowledge and skills found in Standards II A – F below.

**Standard II-A: Foundations of Practice**

Applicant has demonstrated knowledge of:

A1. Genetics, embryology and development of the auditory and vestibular systems, anatomy and physiology, neuroanatomy and neurophysiology, and pathophysiology of hearing and balance over the life span

A2. Effects of pathogens, and pharmacologic and teratogenic agents, on the auditory and vestibular systems

A3. Language and speech characteristics and their development for individuals with normal and impaired hearing across the life span

A4. Principles, methods, and applications of acoustics, psychoacoustics, and speech perception, with a focus on how each is impacted by hearing impairment throughout the life span

A5. Calibration and use of instrumentation according to manufacturers’ specifications and accepted standards

A6. Standard safety precautions and cleaning/disinfection of equipment in accordance with facility-specific policies and manufacturers’ instructions to control for infectious/contagious diseases

A7. Applications and limitations of specific audiologic assessments and interventions in the context of overall client/patient management

A8. Implications of cultural and linguistic differences, as well as individual preferences and needs, on clinical practice and on families, caregivers, and other interested parties

A9. Implications of biopsychosocial factors in the experience of and adjustment to auditory disorders and other chronic health conditions

A10. Effects of hearing impairment on educational, vocational, social, and psychological function throughout the life span

A11. Manual and visual communication systems and the use of interpreters/transliterator/translators

A12. Effective interaction and communication with clients/patients, families, professionals, and other individuals through written, spoken, and nonverbal communication

A13. Principles of research and the application of evidence-based practice (i.e., scientific evidence, clinical expertise, and client/patient perspectives) for accurate and effective clinical decision making

A14. Assessment of diagnostic efficiency and treatment efficacy through the use of quantitative data (e.g., number of tests, standardized test results) and qualitative data (e.g., standardized outcome measures, client/patient-reported measures)

A15. Client-centered, behavioral, cognitive, and integrative theories and methods of counseling and their relevance in audiologic rehabilitation

A16. Principles and practices of client/patient/person/family-centered care, including the role and value of clients’/patients’ narratives, clinician empathy, and shared decision making regarding treatment options and goals

A17. Importance, value, and role of interprofessional communication and practice in patient care
A18. The role, scope of practice, and responsibilities of audiologists and other related professionals
A19. Health care, private practice, and educational service delivery systems
A20. Management and business practices, including but not limited to cost analysis, budgeting, coding, billing and reimbursement, and patient management
A21. Advocacy for individual patient needs and for legislation beneficial to the profession and the individuals served
A22. Legal and ethical practices, including standards for professional conduct, patient rights, confidentiality, credentialing, and legislative and regulatory mandates
A23. Principles and practices of effective supervision/mentoring of students, other professionals, and support personnel

Standard II-B: Prevention and Screening
Applicant has demonstrated knowledge of and skills in:
B1. Educating the public and those at risk on prevention, potential causes, effects, and treatment of congenital and acquired auditory and vestibular disorders
B2. Establishing relationships with professionals and community groups to promote hearing wellness for all individuals across the life span
B3. Participating in programs designed to reduce the effects of noise exposure and agents that are toxic to the auditory and vestibular systems
B4. Utilizing instrument(s) (i.e. sound-level meter, dosimeter, etc.) to determine ambient noise levels and providing strategies for reducing noise and reverberation time in educational, occupational, and other settings
B5. Recognizing a concern on the part of medical providers, individuals, caregivers, or other professionals about hearing and/or speech-language problems and/or identifying people at risk to determine a need for hearing screening
B6. Conducting hearing screenings in accordance with established federal and state legislative and regulatory requirements
B7. Participating in occupational hearing conservation programs
B8. Performing developmentally, culturally, and linguistically appropriate hearing screening procedures across the life span
B9. Referring persons who fail the hearing screening for appropriate audiologic/medical evaluation
B10. Identifying persons at risk for speech-language and/or cognitive disorders that may interfere with communication, health, education, and/or psychosocial function
B11. Screening for comprehension and production of language, including the cognitive and social aspects of communication
B12. Screening for speech production skills (e.g., articulation, fluency, resonance, and voice characteristics)
B13. Referring persons who fail the screening for appropriate speech-language pathology consults, medical evaluation, and/or services, as appropriate
B14. Evaluating the success of screening and prevention programs through the use of performance measures (i.e., test sensitivity, specificity, and positive predictive value)

Standard II-C: Audiologic Evaluation
Applicant has demonstrated knowledge of and skills in:
C1. Gathering, reviewing, and evaluating information from referral sources to facilitate assessment, planning, and identification of potential etiologic factors
C2. Obtaining a case history and client/patient narrative
C3. Obtaining client/patient-reported and/or caregiver-reported measures to assess function
C4. Identifying, describing, and differentiating among disorders of the peripheral and central auditory systems and the vestibular system
C5. Providing assessments of tinnitus severity and its impact on patients’ activities of daily living and quality of life
C6. Providing assessment of tolerance problems to determine the presence of hyperacusis
C7. Selecting, performing, and interpreting a complete immittance test battery based on patient need and other findings; tests to be considered include single probe tone tympanometry or multifrequency and multicomponent protocols, ipsilateral and contralateral acoustic reflex threshold measurements, acoustic reflex decay measurements, and Eustachian tube function.

C8. Selecting, performing, and interpreting developmentally appropriate behavioral pure-tone air and bone tests, including extended frequency range when indicated.

C9. Selecting, performing, and interpreting developmentally appropriate behavioral speech audiometry procedures to determine speech awareness threshold (SAT), speech recognition threshold (SRT), and word recognition scores (WRSS); obtaining a performance intensity function with standardized speech materials, when indicated.

C10. Evaluating basic audiologic findings and client/patient needs to determine differential diagnosis and additional procedures to be used.

C11. Selecting, performing, and interpreting physiologic and electrophysiologic test procedures, including electrocochleography, auditory brainstem response with frequency-specific air and bone conduction threshold testing, and click stimuli for neural diagnostic purposes.

C12. Selecting, performing, and interpreting otoacoustic emissions testing.

C13. Selecting, performing, and interpreting tests for nonorganic hearing loss.

C14. Selecting, performing, and interpreting vestibular testing, including electronystagmography (ENG)/videonystagmography (VNG), ocular vestibular-evoked myogenic potential (oVEMP), and cervical vestibular evoked myogenic potential (cVEMP).

C15. Selecting, performing, and interpreting tests to evaluate central auditory processing disorder.

Applicant has demonstrated knowledge of:

C16. Electrophysiologic testing, including but not limited to auditory steady-state response, auditory middle latency response, auditory late (long latency) response, and cognitive potentials (e.g., P300 response, mismatch negativity response).

C17. Posturography.

C18. Rotary chair tests.

C19. Video head impulse testing (vHIT).

Standard II-D: Counseling

Applicant has demonstrated knowledge of and skills in:

D1. Identifying the counseling needs of individuals with hearing impairment based on their narratives and results of client/patient and/or caregiver responses to questionnaires and validation measures.

D2. Providing individual, family, and group counseling as needed based on client/patient and clinical population needs.

D3. Facilitating and enhancing clients’/patients’ and their families’ understanding of, acceptance of, and adjustment to auditory and vestibular disorders.

D4. Enhancing clients’/patients’ acceptance of and adjustment to hearing aids, hearing assistive technologies, and osseointegrated and other implantable devices.

D5. Addressing the specific interpersonal, psychosocial, educational, and vocational implications of hearing impairment for the client/patient, family members, and/or caregivers to enhance their well-being and quality of life.

D6. Facilitating patients’ acquisition of effective communication and coping skills.

D8. Enhancing adherence to treatment plans and optimizing treatment outcomes.

D9. Monitoring and evaluating client/patient progress and modifying counseling goals and approaches, as needed.

Standard II-E: Audiologic Rehabilitation across the Life Span

Applicant has demonstrated knowledge of and skills in:
E1. Engaging clients/patients in the identification of their specific communication and adjustment difficulties by eliciting client/patient narratives and interpreting their and/or caregiver-reported measures
E2. Identifying the need for, and providing for assessment of, concomitant cognitive/developmental concerns, sensory-perceptual and motor skills, and other health/medical conditions, as well as participating in interprofessional collaboration to provide comprehensive management and monitoring of all relevant issues
E3. Responding empathically to clients’/patients’ and their families’ concerns regarding communication and adjustment difficulties to establish a trusting therapeutic relationship
E4. Providing assessments of family members’ perception of and reactions to communication difficulties
E5. Identifying the effects of hearing problems and subsequent communication difficulties on marital dyads, family dynamics, and other interpersonal communication functioning
E6. Engaging clients/patients (including, as appropriate, school-aged children/adolescents) and family members in shared decision making regarding treatment goals and options
E7. Developing and implementing individualized intervention plans based on clients’/patients’ preferences, abilities, communication needs and problems, and related adjustment difficulties
E8. Selecting and fitting appropriate amplification devices and assistive technologies
E9. Defining appropriate electroacoustic characteristics of amplification fittings based on frequency-gain characteristics, maximum output sound-pressure level, and input–output characteristics
E10. Verifying that amplification devices meet quality control and American National Standards Institute (ANSI) standards
E11. Conducting real-ear measurements to (a) establish audibility, comfort, and tolerance of speech and sounds in the environment and (b) verify compression, directionality, and automatic noise management performance
E12. Incorporating sound field functional gain testing when fitting osseointegrated and other implantable devices
E13. Conducting individual and/or group hearing aid orientations to ensure that clients/patients can use, manage, and maintain their instruments appropriately
E14. Identifying individuals who are candidates for cochlear implantation and other implantable devices
E15. Counseling cochlear implant candidates and their families regarding the benefits and limitations of cochlear implants to (a) identify and resolve concerns and potential misconceptions and (b) facilitate decision making regarding treatment options
E16. Providing programming and fitting adjustments; providing postfitting counseling for cochlear implant clients/patients
E17. Identifying the need for—and fitting—electroacoustically appropriate hearing assistive technology systems (HATS) based on clients’/patients’ communication, educational, vocational, and social needs when conventional amplification is not indicated or provides limited benefit
E18. Providing HATS for those requiring access in public and private settings or for those requiring necessary accommodation in the work setting, in accordance with federal and state regulations
E19. Ensuring compatibility of HATS when used in conjunction with hearing aids, cochlear implants, or other devices and in different use environments
E20. Providing or referring for consulting services in the installation and operation of multi-user systems in a variety of environments (e.g., theaters, churches, schools)
E21. Providing auditory, visual, and auditory–visual communication training (e.g., speechreading, auditory training, listening skills) to enhance receptive communication
E22. Counseling clients/patients regarding the audiologic significance of tinnitus and factors that cause or exacerbate tinnitus to resolve misconceptions and alleviate anxiety related to this auditory disorder
E23. Counseling clients/patients to promote the effective use of ear-level sound generators and/or the identification and use of situationally appropriate environmental sounds to minimize their perception of tinnitus in pertinent situations
E24. Counseling clients/patients to facilitate identification and adoption of effective coping strategies to reduce tinnitus-induced stress, concentration difficulties, and sleep disturbances
E25. Monitoring and assessing the use of ear-level and/or environmental sound generators and the use of adaptive coping strategies to ensure treatment benefit and successful outcome(s)
Standard II-F: Pediatric Audiologic (Re)habilitation
Applicant has demonstrated knowledge of and skills in:
F1. Counseling parents to facilitate their acceptance of and adjustment to a child’s diagnosis of hearing impairment
F2. Counseling parents to resolve their concerns and facilitate their decision making regarding early intervention, amplification, education, and related intervention options for children with hearing impairment
F3. Educating parents regarding the potential effects of hearing impairment on speech-language, cognitive, and social–emotional development and functioning
F4. Educating parents regarding optional and optimal modes of communication; educational laws and rights, including 504s, individualized education programs (IEPs), individual family service plans (IFSPs), individual health plans; and so forth
F5. Selecting age/developmentally appropriate amplification devices and HATS to minimize auditory deprivation and maximize auditory stimulation
F6. Instructing parents and/or child(ren) regarding the daily use, care, and maintenance of amplification devices and HATS
F7. Planning and implementing parent education/support programs concerning the management of hearing impairment and subsequent communication and adjustment difficulties
F8. Providing for intervention to ensure age/developmentally appropriate speech and language development
F9. Administering self-assessment, parental, and educational assessments to monitor treatment benefit and outcome
F10. Providing ongoing support for children by participating in IEP or IFSP processes
F11. Counseling the child with hearing impairment regarding peer pressure, stigma, and other issues related to psychosocial adjustment, behavioral coping strategies, and self-advocacy skills
F12. Evaluating acoustics of classroom settings and providing recommendations for modifications
F13. Providing interprofessional consultation and/or team management with speech-language pathologists, educators, and other related professionals

Standard III: Verification of Knowledge and Skills
Applicants for certification must have completed supervised clinical experiences under an ASHA-certified audiologist who has completed at least 2 hours of professional development in the area of clinical instruction/supervision. The experiences must meet CAA standards for duration and be sufficient to demonstrate the acquisition of the knowledge and skills identified in Standard II.

Implementation: The applicant’s doctoral program director or designated signatory must verify that the applicant has acquired and demonstrated all of the knowledge and skills identified in Standard II.

Clinical instructors and supervisors must have:
- current CCC-A certification,
- a minimum of 9 full-time months of clinical experience after earning the CCC-A, and completed at least 2 hours of professional development (2 certification maintenance hours [CMHs], or 0.2 ASHA continuing education units [ASHA CEUs]) in the area of clinical instruction/supervision.

Clinical instruction and supervision within a doctoral program must:
- be conducted for a variety of clinical training experiences (i.e., different work settings and with different populations) to validate knowledge and skills across the scope of practice in audiology;
• include oversight of clinical and administrative activities directly related to client/patient care, including direct client/patient contact, consultation, recordkeeping, and administrative duties relevant to audiology service delivery;
• be appropriate to the student's level of training, education, experience, and competence;
• include direct observation, guidance, and feedback to permit the student to (a) monitor, evaluate, and improve performance and (b) develop clinical competence; and be provided on site.

Any portion of the applicant's supervised clinical experience that was not completed under an audiologist meeting the requirements above can be completed post-graduation. The applicant's post-graduation clinical instructor/supervisor must also meet the above requirements will also verify that the applicant has demonstrated and acquired the knowledge and skills for ASHA certification following completion of the required supervised clinical experience.

Applicants who apply for certification without completing a full, supervised clinical experience under a clinical instructor/supervisor who meets the requirement above within their degree program will have 24 months from their application-received date to initiate the remainder of their experience and will have 48 months from the initiation date of their post-graduation supervised clinical experience to complete the experience.

If clinical instruction and supervision are completed post-graduation, they must comply with the requirements above with the exception of on-site clinical instruction and supervision. Remote supervision or telesupervision methods may be used, provided they are permitted by the employer(s) and by local, state, and federal regulations.

The supervised clinical experience should include interprofessional education and interprofessional collaborative practice (IPE/IPP). Under the supervision of their audiologist supervisor, students/applicants’ experience should include experiences with allied health professionals who are appropriately credentialed in their area of practice to enhance the student's knowledge and skills in an interdisciplinary, team–based, comprehensive health care delivery setting.

**Standard IV: Examination**
The applicant must pass the national examination adopted by ASHA for purposes of certification in audiology.

Implementation: Results of the Praxis Examination in Audiology must be submitted directly to ASHA from ETS. A passing exam score must be earned no earlier than 5 years prior to the submission of the application and no later than 2 years following receipt of the application. If the applicant does not successfully pass the exam and does not report the results of the exam to ASHA within the 2-year application period, then the applicant's certification file will be closed. If the applicant passes or reports the results of the exam at a later date, then the individual will be required to reapply for certification under the standards that are in effect at that time.

**Standard V: Maintenance of Certification**

Individuals holding certification must demonstrate (1) continuing professional development, including 1 hour of continuing education in ethics; (2) adherence to the ASHA Code of Ethics; and (3) payment of annual dues and fees.

Implementation: Individuals who hold the CCC in Audiology (CCC-A) must accumulate and report 30 CMHs (or 3.0 ASHA CEUs) of professional development, which must include 1 CMH (or 0.1 ASHA CEU) in ethics during every 3-year certification maintenance interval. Individuals will be subject to random audits of their professional development activities.
Individuals who hold the CCC-A must adhere to the ASHA Code of Ethics ("Code"). Any violation of the Code may result in professional discipline by the ASHA Board of Ethics and/or the CFCC.

Annual payment of certification dues and/or fees is also a requirement of certification maintenance. If certification maintenance requirements are not met, certification status will become Not Current, and then certification will expire. In order to regain certification, individuals must meet the reinstatement requirement that is in effect at the time they submit their reinstatement application.
Advising is an integral and essential component of the CSD major. CSD faculty approach advising seriously and we expect our advisees to do the same. The relationship between a CSD advisor and advisee is purposeful and intentional, designed to serve our majors to graduation and beyond.

Advisor: ____________________________________________________________
Contact Information: ________________________________________________

Declaring the CSD Major

If your first-year advisor is a CSD faculty member, he or she will let you know who your CSD advisor will be; it is likely that your first-year advisor will continue to serve as your CSD major advisor.

If your first-year advisor is not a CSD faculty member, please email the CSD Department Chair, stating that you will be declaring the CSD major and are requesting to have a CSD advisor assigned to you.

For the advising relationship to be fruitful, we expect each advisee to have accomplished the first-year advising goals, as listed below.

The student is able to:

- Access and utilize resources such as the academic calendar, college catalog, and Arches
- Read and use the Program Evaluation tool in Arches to monitor and plan academic progress
- Locate and explain registration and financial aid policies and procedures relevant to first-year students
- Locate and describe the Liberal Arts Core Curriculum requirements and identify courses that meet them
- Know the resources available for academic and personal support
- Describe the three broad categories of college-wide learning outcomes
- Explain and provide examples of how activities in and outside of the classroom contribute to his or her individual learning experience
- Give examples of what it means to be an engaged member of a community
- Identify his or her strengths in the context of future goals
- Take active ownership of his or her college experience
Sophomore Year in the CSD Major

You are expected to meet with your CSD advisor at least two times in the first year you are a CSD major. Once per semester you will sign up for an individual meeting with your advisor to plan out the subsequent semester’s course schedule. In one of those meetings, your advisor will help you sketch out your course schedules for your remaining semesters at Augie. In spring semester, you also will discuss CSD graduate school requirements and expectations, as well as other options, in a group meeting that is followed by an individual meeting. You will receive a handout about strengthening your academic profile to achieve your post-Augustana goals.

You can expect your advisor to:

- Be available by email and phone, and in-person by appointment
- Provide a safe and respectful space to ask questions, discuss your interests, and express your concerns
- Understand and effectively communicate the CSD curriculum and graduation requirements
- Work with you to assess your academic performance and areas of strength to ensure they are consistent with your plans
- Assist you in gaining decision-making skills and skills in assuming responsibility for your educational plans and achievements
- Help you identify connections between learning experiences in and outside the classroom
- Provide referrals to other campus resources

Your advisor expects you to:

- Check your Augustana.edu email account at least once per day and respond as needed
- Sign up for advising meetings one time per term to discuss your upcoming course schedule
- Bring this guidebook to every advising meeting
- Bring a print-out of Evaluate Program to every advising meeting
- Take primary responsibility for making your own decisions based on available information and advice
Junior Year in the Major

The junior year in the CSD major typically is the busiest for our majors because junior majors take both basic and applied courses, and most begin to work as a mentee in our on-campus speech, language, and hearing center.

You will meet one time per semester with your advisor for course planning. In the spring, you also will discuss graduate school or other post-Augie plans in one group meeting that is followed by an additional individual meeting. You will receive a detailed handout about applying to graduate school in CSD or another discipline, if applicable.

You can expect your advisor to:

- Be available by email and phone, and in-person by appointment
- Provide a safe and respectful space to ask questions, discuss your interests, and express your concerns
- Work with you to assess your academic performance and areas of strength to ensure they are consistent with your plans
- Support you in defining your academic, career, and personal goals, and assist you in creating an educational plan that is consistent with those goals
- Assist you in gaining decision-making skills and skills in assuming responsibility for your educational plans and achievements
- Help you identify connections between learning experiences in and outside the classroom
- Provide referrals to other campus resources

Your advisor expects you to:

- Check your Augustana.edu email account at least once per day and respond as needed
- Sign up for advising meetings one time per term to discuss your upcoming course schedule
- Bring this guidebook to every advising meeting
- Bring a print-out of Evaluate Program to every advising meeting
- Take primary responsibility for making your own decisions based on available information and advice
Senior Year in the Major

The senior year is an exciting but stressful time in the CSD major that centers on your coursework, completion of your Senior Inquiry project, and graduate school/post-Augie applications. Early in fall semester, you will schedule an individual meeting with your advisor to finalize your graduate school/post-Augie plans, later in fall semester you will meet with your advisor to discuss your remaining course schedules. In spring semester, you are expected to “check in” briefly with your advisor about post-graduate plans, including graduate school notifications and job offers.

You can expect your advisor to:

- Be available by email and phone, and in-person by appointment
- Provide a safe and respectful space to ask questions, discuss your interests, and express your concerns
- Work with you to assess your academic performance and areas of strength to ensure they are consistent with your plans
- Support you in defining your academic, career, and personal goals, and assist you in creating an educational plan that is consistent with those goals
- Provide referrals to other campus resources

Your advisor expects you to:

- Check your Augustana.edu email account at least once per day and respond as needed
- Apply for graduation
- Sign up for advising meetings one time per semester to discuss your upcoming course schedule
- Bring this guidebook to every advising meeting
- Bring a print-out of Evaluate Program to every advising meeting
- Take primary responsibility for making your own decisions based on available information and advice
PART THREE

Master of Science in Speech-Language Pathology Program

The master’s program in speech-language pathology at Augustana College is an Applicant for Candidacy by the Council on Academic Accreditation in Audiology and Speech-Language Pathology (CAA) of the American Speech-Language-Hearing Association, 2200 Research Boulevard, #310, Rockville, MD 20850, 800-498-2071 or 301-296-5700.
Master of Science in Speech-Language Pathology Program  
Mission and Goals

The graduate program in Speech-Language Pathology seeks to develop in every student an appreciation of the importance of communication in a person’s sense of being and self-worth, and of the need to treat all individuals with dignity and respect. Students complete a rigorous program of study that includes coursework, clinical experiences, service learning, and research, and opportunities for positions of ethical leadership and service in the community. Students participate in departmental experiences that draw upon and further develop the habits of open mindedness, reflective inquiry, critical thinking, and independence that are central to the liberal arts. To prepare students who are eligible for certification by the American Speech-Language-Hearing Association, academic and clinical faculty provide intentional and individualized teaching, mentoring, and advising that foster a firm knowledge base, an emerging clinical competence, strong written and oral communication skills, and respectful interactions. Through study in the Master of Science in Speech-Language Pathology Program, students improve the quality of life for others and through this service lead committed lives.

To accomplish this mission, the Master of Science in Speech-Language Pathology Program sets as its goals that:

1. Students will have a firm foundation in anatomical/physiological, physical/psychophysical, linguistic/psycholinguistic, and cultural bases of communication, as well as the basic principles and procedures for identification and remediation of speech, language, swallowing, and hearing disorders in individuals across the lifespan.

2. Students will acquire the art and science skills needed to become highly competent clinicians who engage in evidence-based practice, actively participate in professional organizations, embrace lifelong learning, and develop independence.

3. Students will express themselves orally and in writing in a manner that is reflective, involves critical thinking, and is appropriate for personal, academic, and professional audiences.

4. Students will engage in ethical behavior by conducting themselves with academic and professional integrity and demonstrate an appreciation for the importance of communication to quality of life.
Master of Science in Speech-Language Pathology Program
Strategic Plan

The Communication Sciences and Disorders Department at Augustana College seeks to build a Master of Science in Speech-Language Pathology Program that expands upon the excellence of our long-standing undergraduate-only CSD major. We strive to make Augustana College a destination for liberal arts-minded students seeking a vocation in the speech, language, and hearing sciences.

We aim to accomplish five initial goals as we begin our program.

1. Attract, employ, and retain faculty members who are committed to excellence in teaching, research, and service in a vibrant student-focused liberal arts environment.

2. Nurture open, strong, and collegial relationships with our local clinical partners.

3. Attract and enroll students who are academically accomplished, intellectually curious, clinically capable, and community minded.

4. Create a physical space that is beautiful, functional, and flexible to meet the multi-faceted needs of our department, campus, and local communities.

Master of Science in Speech-Language Pathology Program
Curriculum Design

The Master of Science in Speech-Language Pathology curriculum incorporates Augustana’s SLP graduate program mission and goals, as well as the ASHA Council of Academic Accreditation’s Knowledge and Skills outcomes. The curriculum focuses on communication as a human right, offering a rich variety of experiences, including coursework, clinical practicum, service learning, research, and opportunities for positions of ethical leadership, for graduate students who will be eligible for the Certificate of Clinical Competence in Speech-Language Pathology (CCC-SLP) by ASHA upon graduation, as well as meet the state licensure requirements established by the Illinois Department of Financial and Professional Regulation and the Illinois State Board of Education for practice in the Illinois public schools as a speech-language pathologist. All academic coursework will be completed on campus, as will the first four semesters (Summer 1, Fall 1, Spring 1, and Summer 2) of clinical practicum. In the following two terms (Fall 2 and Spring 2), students will complete one semester of Pediatric Externship and one semester of Adult Externship in the Quad Cities community.
Course Requirements for the Master of Science in Speech-Language Pathology Degree

Students must complete a total of 82 graduate credits in the program, including 28 credits of clinical coursework and 54 credits of academic coursework.

ASHA’s Council on Academic Accreditation
Speech-Language Pathology Knowledge and Skills within the Curriculum

The graduate curriculum in Speech-Language Pathology provides students the opportunity to acquire knowledge and skills across the speech-language pathology curriculum, as required by the ASHA Council on Academic Accreditation (CAA). The knowledge and skills specified by CAA are categorized into six broad areas, including Professional Practice; Foundations of SLP Practice; Identification and Prevention of Speech, Language, and Swallowing Disorders and Differences; Evaluation of Speech, Language, and Swallowing Disorders and Differences; Intervention to Minimize the Effects of Changes in the Speech, Language, and Swallowing Mechanisms; and General Knowledge and Skills Applicable to Professional Practice. The specific knowledge and skills for each area follow. At the end of every semester, students will meet with their advisee to review progress in the program. Please refer to the Advising Syllabus for additional information regarding advisor-advisee meetings.

1. Professional Practice Competencies
   a. Accountability
   b. Integrity
   c. Effective communication skills
   d. Clinical reasoning
   e. Evidence-based practice
   f. Concern for individual served
   g. Cultural competence
   h. Professional duty
   i. Collaborative practice

2. Foundations of Speech-Language Pathology Practice
   a. Discipline of human communication sciences and disorders
   b. Basic human communication and swallowing processes, including the appropriate biological, neurological, acoustic, psychological, developmental, and linguistic and cultural bases
   c. Ability to integrate information pertaining to normal and abnormal human development across the life span
   d. Nature of communications and swallowing processes to include knowledge of:
      - Etiology of the disorders or differences
      - Characteristics of the disorders or differences
      - Underlying anatomical and physiological characteristics of the disorders or differences
      - Acoustic characteristics of the disorders or differences (where applicable)
      - Psychological characteristics associated with the disorders or differences
      - Development nature of the disorders or differences
      - Linguistic characteristics of the disorders or differences (where applicable)
      - Cultural characteristics of the disorders or differences
   e. For the following elements:
      - Articulation
      - Fluency
      - Voice and resonance, including respiration and phonation
      - Receptive and expressive language (phonology, morphology, syntax, semantics, pragmatics, prelinguistic communication, and paralinguistic communication) in speaking, listening, reading, writing, and manual modalities
      - Hearing, including the impact on speech and language
- Swallowing (oral, pharyngeal, esophageal, and related functions, including oral function for feeding; orofacial myology)
- Cognitive aspects of communication (e.g., attention, memory, sequencing, problem solving, executive functioning)
- Social aspects of communication (e.g., behavioral and social skills affecting communication)
- Augmentative and alternative communication

3. Identification and Prevention of Speech, Language, and Swallowing Disorders and Differences
   a. Principles and methods of identification of communication and swallowing disorders and differences
   b. Principles and methods of prevention of communication and swallowing disorders

4. Evaluation of Speech, Language, and Swallowing Disorders and Differences
   a. Articulation
   b. Fluency
   c. Voice and resonance, including respiration and phonation
   d. Receptive and expressive language (phonology, morphology, syntax, semantics, pragmatics, prelinguistic communication, and paralinguistic communication) in speaking, listening, reading, writing, and manual modalities
   e. Hearing, including the impact on speech and language
   f. Swallowing (oral, pharyngeal, esophageal, and related functions, including oral function for feeding; orofacial myology)
   g. Cognitive aspects of communication (e.g., attention, memory, sequencing, problem solving, executive functioning)
   h. Social aspects of communication (e.g., behavioral and social skills affecting communication)
   i. Augmentative and alternative communication needs

5. Intervention to Minimize the Effects of Changes in the Speech, Language, and Swallowing Mechanisms
   a. Intervention for communication and swallowing differences with individuals across the lifespan to minimize the effect of those disorders and differences on the ability to participate as fully as possible in the environment
   b. Intervention for disorders and differences of the following:
   c. Articulation
   d. Fluency
   e. Voice and resonance, including respiration and phonation
   f. Receptive and expressive language (phonology, morphology, syntax, semantics, pragmatics, prelinguistic communication, and paralinguistic communication) in speaking, listening, reading, writing, and manual modalities
   g. Hearing, including the impact on speech and language
   h. Swallowing (oral, pharyngeal, esophageal, and related functions, including oral function for feeding; orofacial myology)
   i. Cognitive aspects of communication (e.g., attention, memory, sequencing, problem solving, executive functioning)
   j. Social aspects of communication (e.g., behavioral and social skills affecting communication)
   k. Augmentative and alternative communication needs
6. General Knowledge and Skills Applicable to Professional Practice
   a. Ethical conduct
   b. Integration and application of knowledge of the interdependence of speech, language, and hearing
   c. Engagement in contemporary professional issues and advocacy
   d. Processes of clinical education and supervision
   e. Professionalism and professional behavior in keeping with the expectations for a speech-language pathologist
   f. Interaction skills and personal qualities, including counseling and collaboration
   g. Self-evaluation of effectiveness of practice
Clinical Coursework and Experiences

SLP-500: Clinical Seminar 1
- Professional Practice Competencies: Effective communication skills; Clinical reasoning; Evidence-based practice
- General Knowledge and Skills Applicable to Professional Practice: Ethical conduct; Integration and application of knowledge of the interdependence of speech, language, and hearing; Engagement in contemporary professional issues and advocacy; Processes of clinical education and supervision; Professionalism

SLP-501: Graduate Practicum 1
- Professional Practice Competencies: Effective communication skills; Clinical reasoning; Evidence-based practice; Concern for individual served; Collaborative practice
- Intervention to Minimize the Effects of Changes in the Speech, Language, and Swallowing Mechanisms: Intervention for communication and swallowing differences; Intervention for disorders and differences in one or more of the nine subcategories (will vary depending on caseload needs)
- General Knowledge and Skills Applicable to Professional Practice: Ethical conduct; Integration and application of knowledge of the interdependence of speech, language, and hearing; Engagement in contemporary professional issues and advocacy; Processes of clinical education and supervision; Professionalism; Interaction skills and personal qualities, including counseling and collaboration; Self-evaluation of effectiveness of practice

SLP-502: Clinical Seminar 2
- Professional Practice Competencies: Effective communication skills; Clinical reasoning; Evidence-based practice
- General Knowledge and Skills Applicable to Professional Practice: Ethical conduct; Integration and application of knowledge of the interdependence of speech, language, and hearing; Engagement in contemporary professional issues and advocacy; Processes of clinical education and supervision; Professionalism

SLP-503: Graduate Practicum 2
- Professional Practice Competencies: Effective communication skills; Clinical reasoning; Evidence-based practice; Concern for individual served; Collaborative practice
- Intervention to Minimize the Effects of Changes in the Speech, Language, and Swallowing Mechanisms: Intervention for communication and swallowing differences; Intervention for disorders and differences in one or more of the nine subcategories (will vary depending on caseload needs)
- General Knowledge and Skills Applicable to Professional Practice: Ethical conduct; Integration and application of knowledge of the interdependence of speech, language, and hearing; Engagement in contemporary professional issues and advocacy; Processes of clinical education and supervision; Professionalism; Interaction skills and personal qualities, including counseling and collaboration; Self-evaluation of effectiveness of practice

SLP-504: Clinical Seminar 3
- Professional Practice Competencies: Effective communication skills; Clinical reasoning; Evidence-based practice
- General Knowledge and Skills Applicable to Professional Practice: Ethical conduct; Integration and application of knowledge of the interdependence of speech, language, and hearing; Engagement in contemporary professional issues and advocacy; Processes of clinical education and supervision; Professionalism
SLP-505: Graduate Practicum 3
- Professional Practice Competencies: Effective communication skills; Clinical reasoning; Evidence-based practice; Concern for individual served; Collaborative practice
- Intervention to Minimize the Effects of Changes in the Speech, Language, and Swallowing Mechanisms: Intervention for communication and swallowing differences; Intervention for disorders and differences in one or more of the nine subcategories (will vary depending on caseload needs)
- General Knowledge and Skills Applicable to Professional Practice: Ethical conduct; Integration and application of knowledge of the interdependence of speech, language, and hearing; Engagement in contemporary professional issues and advocacy; Processes of clinical education and supervision; Professionalism; Interaction skills and personal qualities, including counseling and collaboration; Self-evaluation of effectiveness of practice

SLP-506: Clinical Seminar 4
- Professional Practice Competencies: Effective communication skills; Clinical reasoning; Evidence-based practice
- General Knowledge and Skills Applicable to Professional Practice: Ethical conduct; Integration and application of knowledge of the interdependence of speech, language, and hearing; Engagement in contemporary professional issues and advocacy; Processes of clinical education and supervision; Professionalism

SLP-507: Graduate Practicum 4
- Professional Practice Competencies: Effective communication skills; Clinical reasoning; Evidence-based practice; Concern for individual served; Collaborative practice
- Intervention to Minimize the Effects of Changes in the Speech, Language, and Swallowing Mechanisms: Intervention for communication and swallowing differences; Intervention for disorders and differences in one or more of the nine subcategories (will vary depending on caseload needs)
- General Knowledge and Skills Applicable to Professional Practice: Ethical conduct; Integration and application of knowledge of the interdependence of speech, language, and hearing; Engagement in contemporary professional issues and advocacy; Processes of clinical education and supervision; Professionalism; Interaction skills and personal qualities, including counseling and collaboration; Self-evaluation of effectiveness of practice

SLP-508: Externship—Pediatrics
- Professional Practice Competencies: Effective communication skills; Clinical reasoning; Evidence-based practice; Concern for individual served; Collaborative practice
- Intervention to Minimize the Effects of Changes in the Speech, Language, and Swallowing Mechanisms: Intervention for communication and swallowing differences; Intervention for disorders and differences in one or more of the nine subcategories (will vary depending on caseload needs)
- General Knowledge and Skills Applicable to Professional Practice: Ethical conduct; Integration and application of knowledge of the interdependence of speech, language, and hearing; Engagement in contemporary professional issues and advocacy; Processes of clinical education and supervision; Professionalism; Interaction skills and personal qualities, including counseling and collaboration; Self-evaluation of effectiveness of practice

SLP-509: Externship—Adult
- Professional Practice Competencies: Effective communication skills; Clinical reasoning; Evidence-based practice; Concern for individual served; Collaborative practice
- Intervention to Minimize the Effects of Changes in the Speech, Language, and Swallowing Mechanisms: Intervention for communication and swallowing differences; Intervention for disorders and differences in one or more of the nine subcategories (will vary depending on caseload needs)
- General Knowledge and Skills Applicable to Professional Practice: Ethical conduct; Integration and application of knowledge of the interdependence of speech, language, and hearing; Engagement in contemporary professional issues and advocacy; Processes of clinical education and supervision; Professionalism; Interaction skills and personal qualities, including counseling and collaboration; Self-evaluation of effectiveness of practice
Academic Coursework

SLP-510: Counseling & Professional Issues
- Professional Practice Competencies: Accountability; Integrity; Effective communication skills; Clinical reasoning; Evidence-based practice; Concern for individual served; Cultural competence; Professional duty; Collaborative practice
- Foundations of Speech-Language Pathology Practice: Basic human communication processes; Ability to integrate information pertaining to normal and abnormal human development across the lifespan; Nature of communications and swallowing processes to include knowledge of etiology through cultural characteristics of disorders and differences of the nine subcategories
- Evaluation of Speech, Language, and Swallowing Disorders and Differences: All nine subcategories are covered in this course
- General Knowledge and Skills Applicable to Professional Practice: Ethical conduct; Professionalism; Interaction skills and personal qualities; Self-evaluation of effectiveness of practice

SLP-520: Advanced Speech Sound Disorders
- Professional Practice Competencies: Evidence-based practice; Cultural competence; Collaborative practice
- Evaluation of Speech, Language, and Swallowing Disorders and Differences: Articulation
- Intervention to Minimize the Effects of Changes in the Speech, Language, and Swallowing Mechanisms: Articulation
- General Knowledge and Skills Applicable to Professional Practice: Integration and application of knowledge of the interdependence of speech, language, and hearing

SLP-522: Advanced Language & Literacy Disorders
- Professional Practice Competencies: Effective communication skills; Evidence-based practice; clinical reasoning; Cultural competence
- Foundations of Speech-Language Pathology Practice: Basic human communication processes; Ability to integrate information pertaining to normal and abnormal human development across the lifespan; Nature of communications and swallowing processes for receptive and expressive language, cognitive aspects of communication, and social aspects of communication
- Identification and Prevention of Speech, Language, and Swallowing Disorders and Differences: Principles and methods of identification; Principles and methods of prevention
- Intervention to Minimize the Effects of Changes in the Speech, Language, and Swallowing Mechanisms: Receptive and expressive language, cognitive aspects of communication, social aspects of communication

SLP-524: Multicultural Perspectives & Clinical Practice in CSD
- Professional Practice Competencies: Integrity; Effective communication skills; Clinical reasoning; Evidence-based practice; Concern for individual served; Cultural competence; Professional duty; Collaborative practice
- Foundations of Speech-Language Pathology Practice: Discipline of human communication sciences and disorders; Basic human communication processes; Ability to integrate information pertaining to normal and abnormal human development across the lifespan; Nature of communications and swallowing processes to include knowledge of etiology through cultural characteristics of disorders and differences of the nine subcategories
- Evaluation of Speech, Language, and Swallowing Disorders and Differences: For the disorders and differences of the nine subcategories
- Intervention to Minimize the Effects of Changes in the Speech, Language, and Swallowing Mechanisms: Intervention for communication and swallowing differences; Intervention for the disorders and differences of the nine subcategories
• General Knowledge and Skills Applicable to Professional Practice: Ethical conduct; Integration and application of knowledge of the interdependence of speech, language, and hearing; Professionalism

**SLP-526: Motor Speech Disorders**
• Professional Practice Competencies: Evidence-based practice; Collaborative practice
• Evaluation of Speech, Language, and Swallowing Disorders and Differences: Articulation; Fluency; Voice and resonance
• Intervention to Minimize the Effects of Changes in the Speech, Language, and Swallowing Mechanisms: Articulation; Fluency; Voice and resonance
• General Knowledge and Skills Applicable to Professional Practice: Integration and application of knowledge of the interdependence of speech, language, and hearing

**SLP-530: Diagnostics**
• Professional Practice Competencies: Accountability; Integrity; Effective communication skills; Clinical reasoning; Evidence-based practice; Concern for individual served; Cultural competence; Professional duty; Collaborative practice
• Foundations of Speech-Language Pathology Practice: Basic human communication processes; Ability to integrate information pertaining to normal and abnormal human development across the lifespan; All subcategories are covered in this course
• Identification and Prevention of Speech, Language, and Swallowing Disorders and Differences: Principles and methods of identification
• Evaluation of Speech, Language, and Swallowing Disorders and Differences: All subcategories are covered in this course
• General Knowledge and Skills Applicable to Professional Practice: Ethical conduct; Professionalism; Interaction skills and personal qualities; Self-evaluation of effectiveness of practice

**SLP-540: Aphasia**
• Professional Practice Competencies: Evidence-based practice
• Evaluation of Speech, Language, and Swallowing Disorders and Differences: Receptive and expressive language
• Intervention to Minimize the Effects of Changes in the Speech, Language, and Swallowing Mechanisms: Receptive and expressive language
• General Knowledge and Skills Applicable to Professional Practice: Integration and application of knowledge of the interdependence of speech, language, and hearing

**SLP-542: Dysphagia**
• Professional Practice Competencies: Evidence based practice; Cultural competence; Collaborative practice
• Foundations of Speech-Language Pathology Practice: Nature of communications and swallowing processes to include knowledge of etiology, characteristics, underlying anatomical and physiological characteristics, psychological characteristics, developmental nature, and cultural characteristics for swallowing
• Evaluation of Speech, Language, and Swallowing Disorders and Differences: Swallowing
• Intervention to Minimize the Effects of Changes in the Speech, Language, and Swallowing Mechanisms: Swallowing

**SLP-544: Autism Spectrum Disorders & Augmentative & Alternative Communication**
• Professional Practice Competencies: Effective communication skills; Clinical reasoning; Evidence-based practice; Concern for individual served; Collaborative practice
• Foundations of Speech-Language Pathology Practice: Ability to integrate information pertaining to normal and abnormal human development across the lifespan; Nature of communications and swallowing processes to include knowledge of etiology, characteristics, psychological characteristics, developmental nature, linguistic characteristics, cultural characteristics for receptive and expressive language, cognitive aspects of communication, social aspects of communication, and augmentative and alternative communication
• Identification and Prevention of Speech, Language, and Swallowing Disorders and Differences: Principles and methods of identification; Principles and methods of prevention of communication and swallowing disorders
• Evaluation of Speech, Language, and Swallowing Disorders and Differences: Receptive and expressive language; Cognitive aspects of communication; Social aspects of communication; Augmentative and alternative communication needs
• Intervention to Minimize the Effects of Changes in the Speech, Language, and Swallowing Mechanisms: Intervention for communication and swallowing differences; Intervention for disorders of receptive and expressive language, cognitive aspects of communication, social aspects of communication, and augmentative and alternative communication
• General Knowledge and Skills Applicable to Professional Practice: Ethical conduct; Professionalism

SLP-546: Advanced Audiology Topics
• Professional Practice Competencies: Effective communication skills; Evidence-based practice; Cultural competence; Collaborative practice
• Evaluation of Speech, Language, and Swallowing Disorders and Differences: Hearing, including the impact on speech and language
• Intervention to Minimize the Effects of Changes in the Speech, Language, and Swallowing Mechanisms: Intervention for disorders and differences of hearing, including the impact on speech and language
• General Knowledge and Skills Applicable to Professional Practice: Integration and application of knowledge of the interdependence of speech, language, and hearing

SLP-550: Fluency Disorders
• Professional Practice Competencies: Evidence-based practice
• Identification and Prevention of Speech, Language, and Swallowing Disorders and Differences: Principles and methods of identification of communication and swallowing disorders and differences; Principles and methods of prevention of communication and swallowing disorders
• Evaluation of Speech, Language, and Swallowing Disorders and Differences: Fluency; Social aspects of communication
• Intervention to Minimize the Effects of Changes in the Speech, Language, and Swallowing Mechanisms: Fluency; Social aspects of communication
• General Knowledge and Skills Applicable to Professional Practice: Engagement in contemporary professional issues and advocacy; Interaction skills and personal qualities, including counseling and collaboration

SLP-552: Advanced Research Methods
• Professional Practice Competencies: Accountability; Evidence-based practice
• General Knowledge and Skills Applicable to Professional Practice: Ethical conduct; Integration and application of knowledge of the interdependence of speech, language, and hearing; Self-evaluation of effectiveness of practice

SLP-560: Acquired Cognitive-Communication Disorders
• Professional Practice Competencies: Evidence-based practice; Collaborative practice
• Evaluation of Speech, Language, and Swallowing Disorders and Differences: Cognitive aspects of communication; Social aspects of communication
• Intervention to Minimize the Effects of Changes in the Speech, Language, and Swallowing Mechanisms: Cognitive aspects of communication; Social aspects of communication
• General Knowledge and Skills Applicable to Professional Practice: Integration and application of knowledge of the interdependence of speech, language, and hearing

SLP-570: Comprehensive Examination

SLP-580: Low Incidence Disorders
• Professional Practice Competencies: Evidence-based practice; Cultural competence; Collaborative practice
- Foundations of Speech-Language Pathology Practice: Nature of communications and swallowing processes to include knowledge of etiology, characteristics, underlying anatomical and physiological characteristics, acoustic characteristics, psychological characteristics, linguistic characteristics, and cultural characteristics
- Evaluation of Speech, Language, and Swallowing Disorders and Differences: Articulation; Voice and resonance
- Intervention to Minimize the Effects of Changes in the Speech, Language, and Swallowing Mechanisms: Articulation; Voice and resonance
- General Knowledge and Skills Applicable to Professional Practice: Professionalism and professional behavior in keeping with the expectations for a speech-language pathologist; Integration and application of knowledge of the interdependence of speech, language, and hearing; interaction skills and personal qualities

**SLP-582: Voice Disorders**
- Professional Practice Competencies: Evidence-based practice; Cultural competence; Collaborative practice
- Identification and Prevention of Speech, Language, and Swallowing Disorders and Differences: Principles and methods of identification of communication and swallowing disorders and differences; Principles and methods of prevention of communication and swallowing disorders
- Evaluation of Speech, Language, and Swallowing Disorders and Differences: Voice and resonance; Social aspects of communication
- Intervention to Minimize the Effects of Changes in the Speech, Language, and Swallowing Mechanisms: Voice and resonance; Social aspects of communication
- General Knowledge and Skills Applicable to Professional Practice: Engagement in contemporary professional issues and advocacy; Interaction skills and personal qualities, including counseling and collaboration
Academic Accommodations
If you are a student who has a documented disability, or had academic accommodations in high school or at another institution of higher learning, you may be eligible for services. Services are coordinated through Augustana’s Office of Disability Services (ODS) in compliance with the Americans with Disabilities Act (ADA) is committed to equity, access, and inclusion for all students. Students can meet with the Director of ODS located on the third floor of the Tredway Library in Office 314 Monday-Friday 8:30 a.m. - 4:30 p.m. The office phone number is (309) 794-7145 to schedule an appointment. Please visit the ODS website at https://www.augustana.edu/student-life/residential-life/disability-services for more information.

English Language Proficiency
Admission into M.S. Degree Program: The SLP graduate program will use the same English proficiency standards as Augustana College (i.e., minimum TOEFL score of 550 on the written test or 80 on the internet test, or IELTS minimum of 6.5; writing sample; telephone interview).

Admission into Internal and External Clinical Placements for English Language Learners: Any student who meets the minimum qualifications for internal clinical placement, as demonstrated by meeting the Essential Functions, may participate in the Clinical Practicum Experience. Some externship sites may have additional requirements and as long as they are met, any student, regardless of cultural, linguistic, or individual diversity, will be considered for placement.

Student Retention Policies/Procedures for English Language Learners: Student academic or clinical intervention plans will be followed for students who struggle in academic and/or clinical aspects of the graduate program. These procedures will be followed for all students.

Proficiency in English: Students who demonstrate challenges in the graduate program that are related to English proficiency will be offered ongoing support, when possible, through their academic advisor, instructors, and clinical supervisors. If additional support is needed for the student to maintain minimum academic or clinic standards, additional College resources also may be accessed including assistance from the Office of International Student Life or the Learning Commons that employs tutors who are familiar with procedures to assist students whose primary language is other than English.

The Center Director will be responsible for enforcement of policies and procedures related to clinic and the Department Chair/Graduate Program Director will be responsible for the enforcement of policies and procedures related to academic, graduate admissions, and advising matters.

Advising
Each graduate student will be assigned an academic advisor with whom they will meet individually at least one time per semester. During these formal advising meetings, academic advisors will monitor students’ academic and clinical progress using the Program Evaluation tracking program; review progress toward College and Departmental requirements; advocate on behalf of the student; assist with registration; review major number of clinical hours using CALIPSO; complete a status review if the student has an academic or clinical intervention plan; provide referrals for various forms of academic, social, and clinical support, as needed; and document meeting details in Starfish. Academic advisors work closely with the Center Director.
and Department Chair/Graduate Program Director to ensure that students are on track for successful program completion. Appointments are made by students either signing up electronically or on the paper schedules posted on faculty members’ office doors.

**Office Hours Policy**  
Augustana College Faculty are expected to be available to meet with students outside of class. The CSD Department encourages clinical and academic faculty members to offer several meeting options per week for which students can reserve a time and open times are also available. Clinical faculty hold group meetings for their supervisees that are in addition to individually scheduled office hours, as well.

**Academic Honesty and Integrity**  
Any form of plagiarism or cheating can result in expulsion from the College. According to *Inside Augustana* and the Augustana Honor Code, “Plagiarism is the misrepresentation of someone else’s research, thought, or writing as one's own. Plagiarism is dishonest. It is, in the realm of words and thought, the equivalent of theft in the realm of things.” Furthermore, “Plagiarism means submitting work not one's own as one's own, or an abuse of standard procedures for acknowledging debts to others serious enough to provide persuasive evidence of intent to deceive. The faculty has agreed that the penalty for plagiarism may be, at the discretion of the faculty member, an "F" in the course, but must be an "F" on that piece of work.” Students are responsible for their own conduct. Students also are expected to conduct themselves in a manner consistent with the ASHA Code of Ethics.

**Performance Alerts (Starfish)**  
During the term, faculty are asked to provide feedback to the advising office on each student whose classroom performance is less than satisfactory. Students and advisors are informed of reported difficulties routinely throughout the term. These reports are not part of the permanent record and are used only for advising and academic, social, and medical counseling. Students who receive a Starfish flag will also be provided ways to connect with campus resources. Students should consult their Starfish record and Moodle account, and work with their advisor to find appropriate campus resources for assistance.

**Degree Progress Evaluation**  
The Office of the Registrar provides support and assistance in the degree audit. However, it is ultimately the responsibility of each student to meet degree requirements. Students and advisors may monitor their progress on an unofficial transcript or through the Program Evaluation on Arches.

**Certification of Degree Program**  
A student should track their own progress in Arches on their program evaluation. During a student’s second year at Augustana, the Registrar may provide a complimentary audit to students who have applied to graduate as a courtesy. However, it is the student’s responsibility to check to see that the program of study is listed correctly on their record, and report any concerns to the Office of the Registrar at least one term prior to graduation.

**Student Complaints**  
Student complaints are handled institutionally in a variety of ways, depending on the area, nature, and severity of the complaint. Students typically bring minor complaints directly to the institutional office (i.e., Communication Sciences and Disorders Department) most directly responsible, and a complaint will be handled in accordance with the policies and procedures of that office.
Student complaints regarding any of the graduate program’s policies and procedures or regarding unlawful conduct can be made to the Graduate Program Director and the Center Director, as appropriate. For a complaint involving the Graduate Program Director, the Division Chair should be notified. Student privacy will be maintained by all institutional employees, following FERPA requirements and the ASHA Code of Ethics.

If the complaint cannot be resolved at the departmental level, the matter should be brought to the appropriate higher level administrative office within the reporting structure. See Augustana’s Offices and Services webpage to find the appropriate contact at https://www.augustana.edu/about-us/offices.

Additionally, the college president holds frequent open office hours where students may raise concerns. A schedule of upcoming open office hours is available from the president’s office. To file an official complaint with the college, students also may use the Suggestion Box on the college website at https://www.augustana.edu/about-us/president/suggestions.

A complaint also may be filed by calling the Campus Conduct Hotline at (866) 943-5787, a toll-free number, available on a 24/7 basis to report complaints or concerns.

Students may report and receive assistance with unresolved complaints to the State at Illinois Board of Higher Education at http://complaints.ibhe.org/.

A student may also file a complaint with the college’s accreditor, The Higher Learning Commission, at https://www.hlcommission.org/Student-Resources/complaints.html?highlight=WyJjb21wbGFpbnQiXQ==.

Additionally, information regarding the college’s accreditation and state authorization documents are available upon request from the Provost of the College.

Students may also contact the American Speech-Language-Hearing Association’s Council on Academic Accreditation (CAA) with complaints related to our department’s compliance with program accreditation standards by completing the Complaint Procedure against Graduate Education Programs, which is found online at http://www.asha.org/academic/accreditation/accredmanual/section8.htm. Complaints must be submitted in writing to: Chair, CAA-ASHA, 2200 Research Boulevard, #310, Rockville, MD, 20850. Additional information regarding CAA accreditation standards is found online at http://www.asha.org/academic/accreditation/accredmanual/section3/.

Grade Reports, Grade Appeals, and Access to Records
Grade reports are made available electronically in Arches to students at the end of each term. Students who suspect an error in reporting a grade, or who have a question or complaint about a grade, should first contact the instructor. If it is necessary to carry the inquiry further, the department chair, the division chair, and then the Associate Dean of the College should be consulted. Grade appeals or reporting errors in grade must be made by the conclusion of the following semester’s grading deadline. This includes reporting clerical errors or requests for withdrawals. Requests made after that deadline will not be considered. Students can electronically access their Augustana academic record anytime in Arches.

Student Retention Policies and Intervention Plans
The Master of Science in Speech-Language Pathology curriculum has been designed to provide graduate students with the professional competencies, knowledge, and skills that are needed to
become competent speech-language pathologists, as designated by the American Speech-Language-Hearing Association’s Council on Academic Accreditation. Every academic and clinical course syllabus in the graduate SLP program specifies which of the professional competencies, knowledge, and skills will be taught and assessed in that course.

**Academic Coursework**

Augustana College uses an electronic reporting system, Starfish, to track each student’s progress toward their degree, midterm grades, attendance, course concerns, final grades, GPA, and overall academic performance. Faculty members are required to report attendance and midterm grades for all students in their classes during the semester, and final grades at the end of the semester. Faculty are also strongly encouraged by the College to submit concerns (termed "raising a flag") on Starfish when a student is underperforming. Whenever an academic flag is raised by a student’s professor, the student and the student’s advisor are notified. The advisor then is required to meet with the student, during which time interventions are discussed, as needed, and the advisor develops and/or collaborates with the professor to devise a plan. The advisor then summarizes the meeting and any interventions in Starfish. Advisors are required to contact the Graduate Program Director if a student is at risk of not meeting the program’s academic expectations, and then also report outcomes of that meeting in Starfish. Students have access to these Starfish notes, and they are encouraged to monitor their electronic accounts regularly.

At the end of every semester for every academic course, the instructor will rate every student’s level of competency for each of the student learning outcomes targeted in the course. A 5-point scale (A = 5 points, B = 4, C = 3, D = 2, F = 1) will be used to rate each student’s level of competence at the end of the term. Ratings will be shared with students at the beginning of the following term. Working with the course instructor, students who receive a score below 3.0 on any student learning outcome will be required to develop and complete a student intervention plan for each student learning outcome that is rated below 3.0.

Student intervention plans will be implemented for any student who struggles in academic aspects of the graduate program; the form follows. An intervention plan will be developed by the instructor of an academic course for a student not meeting one or more of the learning outcomes for the course. The student’s intervention plan will specify the learning indicator targeted, the individually-developed intervention, and the date the remediated work is due. Competency will be evaluated as being satisfactory or in need of further remediation.

**Clinical Coursework**

In a procedure similar to what is described above, Starfish will be used to communicate concerns with students, advisors, and other campus officials, if applicable, for clinical aspects of the program after Clinical Practicum Supervisors or Externship Supervisors express initial concerns through CALIPSO. If students have minor or major clinical concerns, a clinic intervention plan will be initiated and will be monitored by the Center Director and, if applicable, Clinical Supervisors and/or Externship Supervisors and the Externship Coordinator.

Intervention plans for student clinicians who do not make adequate progress in the clinic courses and/or practicums or externships are specified in the CSD Clinical Advising Manual.

Master of Science in Speech-Language Pathology  
Advising Syllabus

Advising is an integral and essential component of the SLP program. CSD faculty approach advising seriously and we expect our advisees to do the same. The relationship between a CSD advisor and advisee is purposeful and intentional, designed to serve our students to graduation and beyond.

Advisor: ________________________________________________________________

Contact Information: ____________________________________________________

Summer Semester, Year One

For the advising relationship to be fruitful, we expect each advisee to have accomplished the initial advising goals by the end of the first Summer Semester, as listed below.

By the end of Summer Semester, the student is able to:

- Find and discuss the types of information in this Academic Advising Manual
- Access and utilize resources such as the academic calendar, college catalog, and Arches
- Utilize Starfish to make appointments, check academic progress, and respond to instructor inquiries
- Read and use the Program Evaluation tool in Arches to monitor and plan academic progress
- Locate and explain registration and financial aid policies and procedures relevant to graduate students
- Locate and describe the SLP Graduate Curriculum requirements
- Know the resources available for academic and personal support
- Describe the four goals of the SLP Graduate Program
- Explain and provide examples of how activities in and outside of the classroom contribute to his or her individual learning experience
- Give examples of what it means to be an engaged member of a community
- Enter Self-Reflection of Progress in the SLP Program document into CALIPSO
- Demonstrate at least satisfactory performance on the Student Outcomes Checklist, as indicated by instructors on data they submit in CALIPSO
Fall and Spring Semesters, Year One

You are expected to meet with your CSD advisor at least one time each semester. Once per semester you will sign up for an individual meeting with your advisor to review the subsequent semester’s course schedule.

You can expect your advisor to:

- Be available by email and phone, and in-person by appointment
- Provide a safe and respectful space to ask questions, discuss your interests, and express your concerns
- Understand and effectively communicate the CSD curriculum and graduation requirements
- Work with you to assess your academic performance and areas of strength to ensure they are consistent with your plans
- Assist you in gaining decision-making skills and skills in assuming responsibility for your educational plans and achievements
- Help you identify connections between learning experiences in and outside the classroom
- Provide referrals to other campus resources

Your advisor expects you to:

- Check your Augustana.edu email account at least once per day and respond as needed
- Sign up for advising meetings one time per term to discuss your upcoming course and clinical schedules
- Bring this manual to every advising meeting
- Bring a print-out of Evaluate Program to every advising meeting
- Take primary responsibility for making your own decisions based on available information and advice
- Identify your strengths in the context of future goals
- Take active ownership of your college experience
- Enter Self-Reflection of Progress in the SLP Program document into CALIPSO
- Demonstrate at least satisfactory performance on the Student Outcomes Checklist, as indicated by instructors on data they submit in CALIPSO
Summer, Fall, and Spring Semesters, Year Two

The second year is an exciting but stressful time in the SLP Graduate Program that centers around your coursework, completion of your clinical practicums, preparing for your comprehensive examination, successfully passing the Praxis® Subject Assessment, and planning ahead for post-Augie jobs. Late in spring semester, you are expected to “check in” briefly with your advisor about post-graduation plans, including job applications and offers.

You can expect your advisor to:

- Be available by email and phone, and in-person by appointment
- Provide a safe and respectful space to ask questions, discuss your interests, and express your concerns
- Work with you to assess your academic performance and areas of strength to ensure they are consistent with your plans
- Support you in defining your academic, career, and personal goals, and assist you in creating an educational plan that is consistent with those goals
- Provide referrals to other campus resources
- Work with you to assess your academic performance and areas of strength to ensure they are consistent with your plans
- Support you in defining your academic, career, and personal goals, and assist you in creating an educational plan that is consistent with those goals
- Assist you in gaining decision-making skills and skills in assuming responsibility for your educational and vocational plans and achievements

Your advisor expects you to:

- Check your Augustana.edu email account at least once per day and respond as needed
- Register for and take the Praxis® Subject Assessment in Spring Semester, and inform advisor of score
- Apply for graduation
- Sign up for advising meetings one time per semester to discuss your upcoming course and clinical schedules
- Bring this manual to every advising meeting
- Bring a print-out of Evaluate Program to every advising meeting
- Take primary responsibility for making your own decisions based on available information and advice
- Enter Self-Reflection of Progress in the SLP Program document into CALIPSO
- Demonstrate at least satisfactory performance on the Student Outcomes Checklist, as indicated by instructors on data they submit in CALIPSO

The Year Following Graduation

The SLP Graduate Program will track your employment within one year of graduation. You will be expected to provide employment data (e.g., date of hire, type of facility, city of employment, etc.) to the program’s administrative assistant as soon as you have secured a position.
