ECON-221, ECON-225, ECON-345, ECON-361, ECON-362, ECON-404, or ECON-406	TWO Electives In Economics				8

Major Overview

FROM PETERSONS.COM "Economics Major: What can an economics degree do for you?"

So economics majors can pursue a breadth of career options. Well what do those include, exactly?

Some of the job titles held by economic majors include market analyst, real estate agent, urban planner, policy analyst, business forecaster, research assistant, and statistician, among many, many others. All of these jobs involve, to some extent, the application of the analytical skills that are necessary for those studying economics.

Graduated economics majors have found employment with the following employers, among others: the Federal Reserve Banks, the Bureau of the Census, the Bureau of Labor Statistics, the Department of the Treasury, numerous banks, accounting firms, litigation consulting firms, and market research companies.

What's more, it's looking like the positions for economics majors may actually be growing in number. Remember, these positions are not inherently business related positions, and as such, aren't directly correlated with the status of businesses in America. (Accessed 11-16-2021)
